

Chap. 8 Financial Report

Financial status

1. Balance sheet

The Company's condensed balance sheets for the past five years and explanation of significant changes are as follows:

1. Current assets

In 2007, the Company liquidated its bond funds to meet funding requirements for acquiring Taiwan Fixed Network Co., Ltd. (TFN) shares, resulting in a decrease in current assets. In 2009, the Company upstreamed cash from Taiwan Cellular Co., Ltd's (TCC) capital reduction, resulting in an increase in current assets.

2. Funds and long-term investments

In 2007, the Company increased its investment in TCC to acquire TFN shares. The long-term investments were, however, lower than the previous year as the Company shares held by its subsidiaries were reclassified as treasury stock. Furthermore, TransAsia Telecommunications, Inc. (TAT) and TCC had capital reductions in 2007 and 2009, respectively, resulting in decreased long-term investments.

3. Fixed assets

The disposal of obsolete 2G equipment resulted in a decline in fixed assets.

4. Intangible assets

In 2008, intangible assets increased as the Company merged with TAT International (which was acquired at a premium) and inherited the goodwill.

5. Other assets

In 2007, other assets increased due to reclassification from fixed assets of one of the Company's office buildings being

leased out and an increase in deferred tax assets related to timing difference between financial accounting and tax accounting in the recognition of asset write-off losses.

The 2009 amendment of Article 5 of the Income Tax Act provides for the corporate statutory tax rate to be reduced from 25% to 20% effective 2010; as such, deferred income tax assets were revised downward accordingly.

6. Current liabilities

The Company's raising of bank loans to meet its funding needs in acquiring TFN shares, together with payables arising from capital reduction, resulted in increased current liabilities in 2007. Current liabilities decreased due to bank loan repayment and settlement of capital reduction in 2008.

7. Long-term liabilities

Starting in 2004, repayment of long-term bank loans as well as settlement and conversion of convertible bonds contributed to a steady decline in long-term liabilities. In 2008, however, issuance of the second unsecured corporate bonds and increase in syndicated loans resulted in increased long-term liabilities. In 2009, long-term liabilities decreased anew as the Company repaid its syndicated loans.

8. Other liabilities

In 2007, the Company injected capital into TCC, which further invested in Taihsing International Telecommunications Co., Ltd. (TIT), using cash and TFN shares. The spread between the original cost and the disposal price of the TFN shares on these transactions had been deferred and classified under other liabilities in accordance to SFAS No. 5.

9. Stockholders' equity

The conversion of convertible bonds increased capital and capital surplus, while a 24% capital reduction approved

during the shareholders' meeting in 2007 decreased capital. The Company's shares held by subsidiaries were classified as treasury stock, decreasing shareholders' equity. In 2008, the sale of 300,000 Company's shares by its subsidiary decreased treasury shares, while the disposal gain increased capital surplus and shareholders' equity accordingly.

2. Income statement

The Company's condensed income statements for the past five years and explanation of significant changes are as follows:

1. Non-operating income

In 2006, non-operating income rose on gains of NT\$2.1bn from the disposal of CHT shares. In 2009, non-operating

income decreased due to less investment income from subsidiaries.

2. Non-operating expense

Significant losses from asset write-off of obsolete telecom equipment following its technology upgrade and network integration were recognized in 2007.

Explanation for items in 2009 with major changes > 20% from the previous year:

- (1) The decrease in current liabilities, long-term liabilities and total liabilities were due to repayment of the first unsecured corporate bonds and syndicated loan. Accordingly, current ratio, quick ratio and cash flow ratio increased while debt to asset ratio decreased.
- (2) The decrease in net income from the previous year was due to less investment gain from subsidiaries and higher asset write-off losses. Return on assets, return on equity, pre-tax income as a % of paid-in capital, net income margin and EPS declined accordingly.
- (3) Increase in promotional handset sell-through resulted in higher cost of handset sold. As the inventory didn't rise proportionally, the inventory turnover was up with shorter average days sales.
- (4) The cash reinvestment rate dropped due to increased cash dividends paid out.

Note: 2005-2009 financial data have been duly audited by independent auditors.

Formulas for the above table:

1. Financial structure

- (1) Debt to asset ratio = Total liabilities / Total assets
- (2) Long-term capital to fixed asset ratio = (Shareholders' equity + Long-term liabilities) / Net fixed assets

2. Solvency

- (1) Current ratio = Current assets / Current liabilities
- (2) Quick ratio = (Current assets – Inventory – Prepaid expenses) / Current liabilities
- (3) Interest cover = Income before interest and tax / Interest expense

3. Operations

- (1) Accounts receivable turnover = Net revenue / Average accounts receivable
- (2) Average collection days = 365 / AR turnover ratio
- (3) Inventory turnover = COGS / Average inventory
- (4) Accounts payable turnover = COGS / Average accounts payable
- (5) Average days sales = 365 / Inventory turnover ratio
- (6) Fixed asset turnover = Net revenue / Net fixed assets
- (7) Total asset turnover = Net revenue / Total assets

4. Profitability

- (1) Return on assets = [Net income + Interest expense * (1 – Tax rate)] / Average assets
- (2) Return on equity = Net income / Average equity

(3) Net income margin = Net income / Net sales

(4) EPS = (Net income – Preferred stock dividend) / Weighted average outstanding shares

5. Cash flow

- (1) Cash flow ratio = Cash flow from operating activities / Current liabilities
- (2) Cash flow adequacy ratio = Net cash flow from operating activities for the past 5 years / (Capital expenditures + Increases in inventory + Cash dividend) for the past 5 years
- (3) Cash reinvestment rate = (Cash flow from operating activities – Cash dividends) / (Gross fixed assets + Long-term investments + Other assets + Working capital) (Note: Use 0 if working capital value is negative)

6. Leverage

- (1) Operating leverage = (Net revenue – Variable operating costs and expenses) / Operating income
- (2) Financial leverage = Operating income / (Operating income – Interest expense)

7. Others

- (1) EBITDA = Operating income + Depreciation + Amortization
- (2) EBITDA margin = EBITDA/Net revenue
- (3) ARPU = Net telecom service revenue / Average number of subscribers
- (4) MOU = Outgoing & incoming minutes

Financial and operating results analysis

1. Financial results

1. Taiwan Mobile Co., Ltd. – standalone balance sheet

Explanation of significant changes – i.e., at least a 10% change amounting to more than NT\$10 million – in the past two years' assets, liabilities and shareholders' equity:

- 1. Increase in current assets was due to receiving capital return of NT\$3.5bn from the subsidiary, Taiwan Cellular Co., Ltd.

2. Amendment of Article 5 of the Income Tax Act provides for the corporate statutory tax rate to be reduced from 25% to 20% effective 2010. Deferred income tax assets have been revised downward accordingly.

3. Current liabilities and long-term liabilities decreased due to repayment of the first unsecured corporate bonds and syndicated loan.

2. Operating results

1. Taiwan Mobile Co., Ltd. – standalone income statement

1. Increase in operating costs: Telecom operating cost increased upon consolidation with TransAsia Telecommunications, Inc. (TAT), and cost of handset

sold increased due to higher promotional handset sell-through.

2. Decrease in non-operating gain: Investment income from subsidiaries decreased due to TAT was merged with the Company in September 2008 and its income was reclassified to operating revenue in 2009.

3. Increase in non-operating loss: Asset write-off losses increased due to increased network system integration in 2009.

	Financial leverage	1.03	1.03	

Explanation for items in 2009 with major changes > 20% from the previous year:

- (1) Total liabilities and debt to asset ratio were lower due to repayment of the first unsecured corporate bonds and syndicated loan.
- (2) Increase in promotional handset sell-through resulted in higher cost of handset sold. As the inventory didn't rise proportionally, the inventory turnover was up with shorter average days sales.
- (3) Selling of the Company's shares by its subsidiaries in 2008 resulted in increased capital surplus due to the disposal gain while decreasing treasury shares. Average shareholders' equity increased accordingly, leading to a decrease in return on equity.
- (4) The cash reinvestment rate dropped due to increased cash dividends paid out.

4. Revenue outlook, key assumptions, potential impact on the Company's business and corresponding proposal

In 2010, the Company will continue to leverage mobile internet products to expand its wireless market share. Telecom operators are expected to become more aggressive in devising new acquisition strategies and investing more in the VAS market as the demand for smart devices continues to grow. To realize the full potential of this growth, the Company will focus on developing attractive value-added products and services in order to increase average revenue per user (ARPU). The Company will also pursue a bigger market share of the mid to high usage customers. In order to meet these targets, the Company will utilize the full potential of its growing number of direct stores as well as use its edge in handset procurement to help boost cost and marketing efficiency.

3. Cash flow analysis

1. Taiwan Mobile Co., Ltd. – standalone cash flow analysis

1. Cash flow from operating activities: Cash inflow increased in 2009 as more cash dividends were distributed from TCC, this in spite of higher income tax related cash outflow during the same year.
2. Cash flow from investment activities: Cash outflow was lower in 2008 due to a capital return from TCC.
3. Cash flow from financing activities: Cash outflow was lower in 2009 even after payment of cash dividends and repayment of bank loans since there was a significant capital reduction in 2008.

4. Projected cash flow for 2010

1. Projected cash inflow from operating activities: Projected operating cash inflow in 2010 will decrease from 2009 on account of lower cash dividends to be distributed by subsidiaries under the equity method of accounting. Other than this, the projected cash inflow from operating activities in 2010 is expected to remain stable.
2. Projected cash outflow from investment activities: For capital expenditures
3. Projected cash outflow from financing activities: For distribution of cash dividends and repayment of long-term debts

5. Source of funding for negative cash flow in 2010: Not applicable

Audit Committee Report

Date: January 28, 2010

The Board of Directors of Taiwan Mobile Co., Ltd. (TWM) has submitted the Company's 2009 business report and financial statements. The CPA firm, Deloitte & Touche, was retained to audit TWM's financial statements and has issued an audit report relating to the financial statements. The business report and financial statements have been reviewed and determined to be correct and accurate by the Audit Committee of TWM. According to Article 14-4 of the Securities and Exchange Act and Article 219 of the Company Act, I hereby submit this report on behalf of all members of the committee.

Taiwan Mobile Co., Ltd.

Tsung-Ming Chung
Chairman of the Audit Committee

Taiwan Mobile Co., Ltd.
Financial Statements for the
Years Ended December 31, 2009 and 2008 and
Independent Auditors' Report

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
Taiwan Mobile Co., Ltd.

We have audited the accompanying balance sheets of Taiwan Mobile Co., Ltd. (the "Corporation") as of December 31, 2009 and 2008, and the related statements of income, changes in shareholders' equity and cash flows for the years then ended. These financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of Taiwan Mobile Co., Ltd. as of December 31, 2009 and 2008, and the results of its operations and its cash flows for the years then ended, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, requirements of the Business Accounting Law and Guidelines Governing Business Accounting relevant to financial accounting standards, and accounting principles generally accepted in the Republic of China.

As stated in Note 3 to the financial statements, in March 2007, the Accounting Research and Development Foundation issued an interpretation that requires companies to recognize employees' bonuses and remuneration paid to directors and supervisors as expenses starting from January 1, 2008. The mentioned bonuses and remuneration were previously recorded as appropriations from earnings.

We have also audited the accompanying schedules of significant accounts, provided for supplementary analysis, by applying the same procedures described above. In our opinion, such schedules are consistent, in all material respects, with the financial statements referred to above.

We have also audited the consolidated balance sheets of the Corporation and its subsidiaries as of December 31, 2009 and 2008 and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the years then ended, on which we have issued an audit report dated January 20, 2010, with an unqualified opinion and emphasis of a matter explanatory paragraph, respectively.

January 20, 2010

Notice to Readers

The accompanying financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the auditors' report and the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and financial statements shall prevail.

**NOTES TO FINANCIAL STATEMENTS
YEARS ENDED DECEMBER 31, 2009 AND 2008
(In Thousands of New Taiwan Dollars, Unless Stated Otherwise)**

1. ORGANIZATION AND OPERATIONS

Taiwan Mobile Co., Ltd. was incorporated in the Republic of China (ROC) on February 25, 1997. The Corporation's shares began trading on the ROC Over-the-Counter Securities Exchange (known as GreTai Securities Market) on September 19, 2000. On August 26, 2002, the Corporation's shares were listed on the Taiwan Stock Exchange. The Corporation mainly renders wireless communication services.

The Corporation's services are under the type 1 license issued by the Directorate General of Telecommunications (DGT) of the ROC. The license allows the Corporation to provide services for 15 years from 1997 onwards. It also entails the payment of an annual license fee consisting of 2% of total wireless communication service revenues. On March 24, 2005, the Corporation received the third generation (3G) concession operation license issued by the DGT. The 3G license allows the Corporation to provide services from the issuance date of the license to December 31, 2018.

As of December 31, 2009 and 2008, the Corporation had 2,496 and 2,543 employees, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying financial statements have been prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, the Business Accounting Law, Guidelines Governing Business Accounting, and accounting principles generally accepted in the ROC. In conformity with these guidelines, the Law, and principles, the Corporation is required to make certain estimates and assumptions that could affect the amounts of allowance for doubtful accounts, provision for losses on decline in value of inventories, depreciation, pension, allowance for deferred income tax assets, bonus to employees, remuneration to directors and supervisors, impairment loss on assets, etc. Actual results may differ from these estimates.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the ROC. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

The Corporation's significant accounting policies are summarized as follows:

Classification of Current and Non-current Assets and Liabilities

Current assets include cash and cash equivalents, assets held for trading and those expected to be converted to cash, sold or consumed within twelve months from the balance sheet date. Other assets such as property and equipment and intangible assets are classified as non-current. Current liabilities are obligations held for trading and those expected to be due within twelve months from the balance sheet date. All other liabilities are classified as non-current.

Cash Equivalents

Government bonds and short-term bills acquired with repurchase rights and having maturities of up to three months from the date of purchase are classified as cash equivalents, whose carrying value approximates fair value.

Available-for-sale Financial Assets

On initial recognition, available-for-sale financial assets are recognized at fair value plus transaction costs. When subsequently measured at fair value, the fair value changes are recognized directly in equity. The cumulative gain or loss that was recognized in equity is recognized in profit or loss when an available-for-sale financial asset is derecognized from the balance sheet. The purchase or sale of the financial instruments is recognized and derecognized using trade date accounting.

Cash dividends are recognized as dividend income on the ex-dividend date, but are accounted for as reductions to the original cost of investments if such dividends are declared on the earnings of investees attributable to periods prior to the purchase of investments. Stock dividends are not recognized as current income but are accounted for only as an increase in the number of shares held. The cost per share is re-calculated based on the new number of shares.

An impairment loss is recognized if there is objective evidence that a financial asset is impaired. If the amount of impairment loss decreases in the subsequent period, such decrease is recognized in equity.

The fair value of listed stocks is based on the closing price on the balance sheet date.

Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided on the basis of past experiences and an evaluation of the aging and collectibility of all receivables on the balance sheet date.

Inventories

Inventories are recorded at weighted-average cost. Before January 1, 2009, inventories are stated at the lower of the cost or market value. Market value is evaluated on the basis of replacement cost or net realizable value. Effective from January 1, 2009, however, inventories are stated at the lower of cost or net realizable value. When comparing cost and net realizable value, inventories are evaluated by individual items.

Investments Accounted for Using the Equity Method

Long-term investments in which the Corporation owns 20% or more of an investee's outstanding voting shares or exercises significant influence on an investee are accounted for under the equity method.

In accordance with the newly revised Statement of Financial Accounting Standards (SFAS), the cost of acquisition is subjected to an initial analysis, and goodwill represents the excess of the cost of acquisition over the fair value of the identifiable net assets value. Goodwill is no longer amortized. If the fair value of identifiable net assets acquired exceeds the cost of investments, the excess should be assigned to non-current assets (except for financial assets not under equity method, assets for disposal, deferred income tax assets and prepaid pension costs or other retirement benefit costs). If these assets are all reduced to zero, the remaining excess should be recognized as extraordinary gain. Starting January 1, 2006, the unamortized balance of the excess of the acquisition cost of the long-term investment by the equity method over the equity in the investee's net assets value is also no longer amortized and applies the same accounting treatment as goodwill.

Gains or losses from downstream transactions to its subsidiaries are deferred and included in deferred income (loss) and recorded as other liabilities (assets). Gains or losses on the upstream transactions to the Corporation by equity-method investees that are not majority owned are deferred in proportion to the Corporation's ownership percentages in the investees until these sales are realized through transactions with third parties.

The cost and the resulting gain or loss of an investment sold is determined by the weighted-average method.

Financial Assets Carried at Cost

If there is no active market for an equity instrument and a reliable fair value cannot be estimated, the equity instrument, including non-publicly traded and emerging stocks, etc, is measured at cost. The accounting for the dividends from financial asset carried at cost is the same as that for an available-for-sale financial asset. Impairment losses are recognized if a decrease in the fair value of the instruments can be objectively related to an event. Reversal of impairment losses is not allowed.

Property and Equipment and Assets Leased to Others

Property and equipment and assets leased to others are stated at cost less accumulated depreciation and accumulated impairment. Significant additions, renewals, betterments, and interest expenses incurred during the construction period are capitalized, while maintenance and repairs are expensed. Leased property and equipment from others covered by agreements qualifying as capital leases are carried at the lower of the present value of future minimum lease payments or the market value of the property on the starting dates of the leases.

For cost associated with dismantling and relocating fixed assets and restoring the leased premises housing our fixed assets to the previous state should be recognized as an addition to the fixed assets and accrued as a potential liability accordingly, according to the Interpretation No. 2008-340 issued by the Accounting Research and Development Foundation (ARDF) in November 2008.

Depreciation is calculated using the straight-line method over the estimated service lives, which range as follows: buildings - 50 to 55 years; telecommunication equipment - 2 to 15 years; office equipment - 3 to 5 years; leased assets - 20 years; and miscellaneous equipment - 3 to 5 years.

Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to non-operating gain or loss in the period of disposal.

Accounting for Leases

In accordance with SFAS No. 2, "Accounting for Leases," a lease is identified as either an operating lease or a capital lease based on the lease contract terms, the collectability of the leasehold and the non-reimbursable costs to be incurred by the lessor.

The asset held under an operating lease is stated at cost, and depreciated on the straight-line basis over the estimated useful life. Receivables collected are periodically recognized as rental income during the lease contract.

At the inception date of a capital lease, total leasehold receivables shall be recognized as all rental receivables plus the pre-determined bargain purchase price offered to the lessee upon maturity or estimated residual value. For a financing-type of capital lease, leasehold receivables should be recognized as the sum of present value derived from each future rental receivable based on an implicit interest rate of the lease. The excess of total leasehold receivables over the present value of leasehold receivables should be deferred as unrealized interest income, and amortized as interest income by the effective interest method upon each collection.

Intangible Assets

- a. Franchise
Franchise refers to the payment for the 3G mobile telecommunication service - License C. The 3G concession is recorded at acquisition cost and is amortized by the straight-line method over 13 years and 9 months starting from the launch of 3G services.
- b. Computer software
Computer software cost is amortized by the straight-line method over 3 years.
- c. Goodwill
In accordance with the newly revised SFAS, goodwill is no longer amortized. Please refer to the accounting policy of investments accounted for by the equity method.

Idle Assets

Properties not currently used in operations are stated at the lower of book value or net realizable value, with the difference charged to current loss. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets.

Deferred Charges

Deferred charges, mainly interior decoration cost are amortized by the straight-line method over 3 to 7 years.

Asset Impairment

If the carrying value of assets (including property and equipment, intangible assets, idle assets, assets leased to others, investments accounted for using equity method and deferred charge) is more than its recoverable amount, which indicates that an impairment exists, an impairment loss should be recognized. Any subsequent reversal of the impairment loss for the increase in recoverable amount is recognized as income. The reversal of impairment loss on goodwill is not allowed.

Share-based Compensation

For the grant date of the employee stock options which falls on or after January 1, 2008 should apply SFAS No. 39 - "Accounting for Share-based Payment". The value of stock option granted, the product of the number of vested stock options multiplies by the fair value of the option on grant date, shall be expensed over the vesting period, and to increase "capital surplus - employee stock options" by the same amount accordingly.

Pension Costs

The pension costs under the defined benefit pension plan are recognized on the basis of actuarial calculations. The contribution amounts of the pension costs under the defined contribution pension plan are recognized as current expenses during the employees' service years.

Income Taxes

The inter-period and intra-period allocation method is used for income taxes. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits and net operating loss carryforwards. Valuation allowance is provided for deferred income tax assets to the extent that more likely than not such assets will not be realized. Deferred tax assets or liabilities are classified as current or non-current according to the classification of related assets or liabilities for financial reporting. However, if deferred tax assets or liabilities do not relate to assets or liabilities in the financial statements, they are classified as current or non-current on the basis of the expected length of time before realized.

Tax credits for certain purchases of equipment and technology, research and development expenditures and personnel training are recognized by the current method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax expense.

Income tax of 10% on unappropriated earnings generated is provided for as income tax in the year when the shareholders resolve the retention of the earnings.

Treasury Stock

The purchase of issued shares is accounted for by debiting treasury stock, which is a reduction of shareholders' equity. The Corporation's shares held by its subsidiaries are treated as treasury stock and reclassified from investments accounted for using equity method to treasury stock.

If the proceeds on the disposal of treasury stock exceed the carrying value of treasury stock, the excess is credited to capital surplus from treasury stock. If the proceeds are less than the carrying value of treasury stock, the difference is debited to capital surplus from treasury stock. If the balance of capital surplus from treasury stock is not sufficient to absorb the difference, the rest is recorded as a reduction of retained earnings.

Foreign-currency Transactions

Assets, liabilities, revenues or expenses denominated in foreign currencies as a result of foreign-currency transactions of non-derivative financial instruments are recorded in New Taiwan dollars at the exchange rates prevailing on the dates of transactions.

Monetary assets or liabilities denominated in foreign currencies are translated at the exchange rates prevailing on the balance sheet date, and the resulting exchange differences are included in profit or loss for the current year.

Non-monetary assets or liabilities carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date when the fair value was determined, and the resulting exchange differences are included in profit or loss for the current year except for the differences arising on the retranslation of non-monetary assets and liabilities in respect of which gains and losses are recognized directly in equity. For such non-monetary assets and liabilities, any exchange component of that gain or loss is also recognized directly in equity. Non-monetary assets or liabilities carried at cost that are denominated in foreign currencies are translated at the historical rates prevailing on the dates of transactions.

The above prevailing exchange rates are based on the average of bid and ask rates of major banks.

Revenue Recognition

Revenues are recognized when the service rendering process is completed or virtually completed, and earnings are realizable and measurable. Related costs of providing services are concurrently recognized as incurred.

Service revenues from wireless services and value-added services, net of any applicable discount, are billed at predetermined rates. Prepaid card services are recognized on the basis of minutes of usage.

Promotion Expenses

Commissions and cellular phone subsidy costs pertaining to the Corporation's promotions are recognized as marketing expenses on an accrual basis in the current period.

Hedging Derivative Financial Instruments

Derivatives that qualify as effective hedging instruments are measured at fair value, with subsequent changes in fair value recognized either in earnings or shareholders' equity, depending on the nature of the hedge.

Hedge Accounting

When hedge accounting is applied, gain or loss from changes in the fair value of the derivatives (hedging instruments) shall be offset by that of financial assets/liabilities (hedged position).

The Corporation entered into interest rate swaps (IRS) contracts to hedge against cash flow risk from inverse floating interest rates of liabilities, thus was qualified to apply hedge accounting. The accounting treatment is as follows: Gain or loss from changes in the fair value of the derivatives, which is recognized in shareholder's equity, shall be reclassified in earnings, if gain or loss from the expected transaction of the hedged position occurs. When there is objective evidence that the net loss recognized in shareholders' equity is expected to be not recoverable, the mentioned net loss should be reclassified in earnings as well.

Reclassification

Certain accounts in the financial statements as of and for the year ended December 31, 2008 have been reclassified to conform to the presentation of financial statements as of and for the year ended December 31, 2009.

3. REASONS AND EFFECT OF CHANGES IN ACCOUNTING PRINCIPLES

In March 2007, the ARDF issued an interpretation that requires companies and their subsidiaries to recognize those bonuses to employees and remunerations to directors and supervisors as compensation expenses starting from January 1, 2008. The mentioned bonuses and remunerations were previously recorded as appropriations from earnings. The adoption of this interpretation resulted in a decrease of \$342,125 thousand in net income and a decrease in basic earnings per share of \$0.12 for the year ended December 31, 2008.

a. Taiwan Cellular Co., Ltd.

On April 18, 2008, TCC's Board of Directors decided to reduce its capital by \$1,000,000 thousand, resulting in the cancellation of 100,000 thousand shares and the cash return to investors. On the record date (May 1, 2008), the Corporation was entitled to receive \$1,000,000 thousand based on its 100% equity in TCC.

On July 29, 2008, TCC's Board of Directors decided to reduce its capital by \$1,150,000 thousand, resulting in the cancellation of 115,000 thousand shares and the cash return to investors. On the record date (August 1, 2008), the Corporation was entitled to receive \$1,150,000 thousand based on its 100% equity in TCC.

On December 24, 2009, TCC's Board of Directors resolved to:

- 1) Transfer \$2,300,417 thousand from capital surplus into capital, which increased its issued shares by 230,042 thousand on the record date of December 25, 2009;
- 2) Reduce \$3,500,000 thousand of capital to shareholders through the cancellation of 350,000 thousand shares. On the record date of capital reduction (December 26, 2009), the Corporation, based on its 100% ownership in TCC, was entitled to receive \$3,500,000 thousand.

The Corporation invested in Taiwan Fixed Network Co., Ltd. (TFN) indirectly through Taiwan Cellular Co. Ltd. (TCC) with shares of the former TFN as investment. Based on the revised SFAS No. 5, "Long-term Investments in Equity Securities," unrealized gains and losses on downstream transactions should be deferred. Thus, the difference between the original carrying cost and the investment price of the former TFN shares of this transaction should be treated as deferred gains. As of December 31, 2009, the amount of deferred credits recognized by the Corporation was \$1,238,378 thousand.

As of December 31, 2009, TCC Investment Co., Ltd. (TCCI, 100%-owned by Taiwan Cellular Co., Ltd), TCCI Investment & Development Co., Ltd. (TID, 100%-owned by TCCI) and TFN Union Investment Co., Ltd. (TUI, 100%-owned by TFN), collectively held 811,918 thousand shares of the Corporation. Based on SFAS No. 30, "Accounting for Treasury Stock", the Corporations' shares held by subsidiaries are treated as treasury stock. This accounting treatment reduced the Corporation's long-term investment value by the same amount as treasury stock account value of \$31,889,100 thousand. Please refer to Note 19 for details.

b. Taipei New Horizons Co., Ltd.

TNH is established to invest in a property development project located in the old Songshan Tobacco Factory site. On January 15, 2009, TNH signed a 50-year BOT contract with Taipei City Government.

The Corporation established TNH on December 31, 2008 with initial investment of \$249,500 thousand, representing 49.9% ownership.

c. Wealth Media Technology Co., Ltd.

WMT's Board of Directors resolved the issuance of 18,500 thousand shares at \$10 par value on March 28, 2008. On the record dates (April 1, 2008), the Corporation subscribed for all the shares and WMT is still a wholly-owned subsidiary of the Corporation.

To expand its CATV business, the Corporation's 100%-owned subsidiary, WMT, plans to buy a 100% stake in Cheng Ting Co., Ltd. to acquire all the cable TV and content distribution business of Kbro Co., Ltd. The purchase will be settled using the Corporation's treasury shares (up to 15.5% of total outstanding shares), and the remainder in cash. The Corporation expects to close the deal after obtaining the authorities' approval.

d. TransAsia Telecommunications Inc.

On July 31, 2008, the Board of Directors of the Corporation resolved to merge TAT, with the Corporation as the surviving company. The record date of the merger was September 2, 2008. The Corporation assumed all the rights and obligations of TAT.

e. Equity in investees' net gains or losses

The carrying value of the investments under the equity method and the related investment income or losses were determined on the basis of audited financial statements.

The Corporation's investment income or losses were as follows:

	December 31	2008
	2009	
TCC	\$ 3,115,006	\$ 3,003,228
TNH	(37,526)	-

TAT	-	1,131,233
	<u>\$ 3,044,360</u>	<u>\$ 4,092,481</u>

All the financial statements of subsidiaries have been consolidated into the consolidated financial statements of the Corporation.

	December 31	2008
	2009	
Foreign unlisted stocks		
Bridge Mobile Pte Ltd.	<u>\$ 50,324</u>	<u>\$ 60,064</u>

Because there is no active market quotation and a reliable fair value can not be estimated, the above investments are measured at cost. An impairment loss of \$9,740 thousand and \$11,532 thousand were recognized for the years of 2009 and 2008, respectively.

10. PROPERTY AND EQUIPMENT - ACCUMULATED DEPRECIATION

	December 31	
	2009	2008
Buildings	\$ 392,953	\$ 343,780
Telecommunication equipment	28,637,272	28,153,739

Miscellaneous equipment	897,906	920,166
	<u>\$ 30,434,884</u>	<u>\$ 29,907,813</u>

Capitalized interest for the years ended December 31, 2009 and 2008 amounted to \$16,685 thousand and \$11,296 thousand, respectively, with capitalization rates ranging from 2.4% to 2.76%.

The Corporation bought farmland located in Yang-Mei, Taoyuan for the amount of \$12,000 thousand from TPN, based on the need for deploying telecom equipment. Because only an individual could be the owner of farmland according to related regulations, its ownership is under the landholder through a fiduciary contract.

11. GOODWILL

On September 2, 2008, the Corporation merged with TAT, resulting in the recognition of goodwill at the book value of \$6,835,370 thousand.

In conformity with SFAS No. 35, "Accounting for Asset Impairment," the Corporation engaged in mobile service, which was viewed as one cash-generating unit in 2009 and 2008. The critical assumptions to evaluate the recoverable amounts of operating assets and goodwill were as follows:

a. Assumptions on operating revenues

After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers, minutes of incoming and outgoing calls and average revenue per minute.

b. Assumptions on operating costs and expenses

The estimates of commissions, customer retention costs, customer service costs and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2009 financial statements.

c. Assumptions on discount rate

For the years ended December 31, 2009 and 2008, the Corporation used the discount rate of 8.50% and 7.48%, respectively, in calculating the asset recoverable amounts.

Based on the key assumptions of the cash-generating unit, the Corporation's management believes that the carrying amounts of these assets for operating and goodwill will not exceed their recoverable amounts even if there are changes in the critical assumptions used to estimate recoverable amounts as long as these changes are reasonable for the years ended December 31, 2009 and 2008.

a. 1st domestic unsecured bonds

On December 13, 2002, the Corporation issued \$15,000,000 thousand of domestic unsecured bonds, with each bond having a face value of \$5,000 thousand. The bonds have four different types based on terms and dates. Types I and II both consist of A to L tranches. Types III and IV both consist of A to M tranches. Types I and II are five-year bonds and Types III and IV are seven-year bonds. The interest rates and payment terms are as follows:

	Principal	Rate	Terms
Type I	\$ 2,500,000	2.60%	Repayment of \$1,250,000 thousand each in the fourth and fifth years, interest payable annually
Type II	2,500,000	5.21%-6M LIBOR	Repayment on maturity date, interest payable semiannually
Type III	5,000,000	2.80%	Repayment of \$2,500,000 thousand each in the sixth and seventh years, interest payable annually
Type IV	5,000,000	5.75%-6M LIBOR	Repayment on maturity date, interest payable semiannually
	<u>\$ 15,000,000</u>		

The last installments of the above-mentioned corporate bonds were repaid by the Corporation in December 2009.

b. 2nd domestic unsecured bonds

On November 14, 2008, the Corporation issued \$8,000,000 thousand five-year domestic unsecured bonds, with each bond having a face value of \$10,000 thousand and a coupon rate of 2.88% per annum, simple interest due annually. Repayments will be made in the fourth and fifth years with equal installments, i.e. \$4,000,000 thousand, respectively.

Future repayments of the above-mentioned corporate bonds are as follows:

Year	Amount
2012	\$ 4,000,000
2013	<u>4,000,000</u>
	<u>\$ 8,000,000</u>

17. LONG-TERM BORROWINGS

To provide medium-term working capital, the Corporation and its subsidiary, TFN, entered into a syndicated loan with a joint credit line of \$13,500,000 thousand with 9 banks led by Cititrust Commercial Bank on February 21, 2008. The tenor is three years starting from May 20, 2008. Based on contract term, interests are payable monthly and the principal is due upon maturity. Upon maturity, the loan is allowed to revolve within its credit limits. The contract requires the Corporation to maintain certain financial ratio including debt ratios, interest coverage, and tangible net asset ratio based on semi-annual financials. The Corporation also bears the repayment liability with respect to TFN's borrowing. Please refer to Note 24 for further information.

18. PENSION PLAN

The Labor Pension Act (LPA) provides for a defined contribution pension plan. Starting from July 1, 2005, the Corporation should contribute monthly an amount equal to 6% of the employees' monthly wages to the employees' individual pension accounts. The contributed amount was \$108,662 thousand and \$107,848 thousand for the years ended December 31, 2009 and 2008, respectively.

The Labor Standards Act (LSA) provides for a defined benefit pension plan. Benefits are based on the length of service and average basic pay of the six months before retirement. The Corporation contributes monthly an amount equal to 2% of the employees' monthly wages to a pension fund. The pension fund is managed by an independently administered pension fund committee and deposited in the committee's name in the Bank of Taiwan (formerly in the Central Trust of China, which was merged into the Bank of Taiwan in July 2007.) Approved by Department of Labor of Taipei City Government, the Corporation suspended contributing from February 2007 to January 2010.

Information on the defined benefit pension plan is summarized as follows:

19. SHAREHOLDERS' EQUITY

a. Capital surplus

Under the Company Act, capital surplus may only be used to offset a deficit. However, capital surplus generated from the excess of the issue price over the par value of capital stock, including the stock issued for new capital and the buyback of treasury stock, may be transferred to capital as stock dividends, and this transfer is restricted to a certain percentage of the capital surplus and may be made only within prescribed limits each time. Also, the capital surplus from long-term investments may not be used for any purpose.

b. Appropriation of earnings and dividend policy

The Corporation's Articles of Incorporation provide that a 10% legal reserve should be set aside from the annual net income after the reduction of accumulated deficit. The remainder, less special reserve based on relevant laws or regulations or business requirements, should be distributed as follows:

- 1) Dividends and bonus to preferred shareholders
- 2) Remuneration to directors and supervisors - up to 0.3%
- 3) Bonus to employees - 1%-3%
- 4) Remainder, to be appropriated as dividends as determined in the shareholders' meeting.

The Corporation's dividend distribution is based on the availability of excess funds. That is, the Corporation first projects future capital needs through a capital budgeting process and then provides for the projected capital needs by using retained earnings. Any remainder is available for dividend distribution. However, the amount of stock dividends should not be more than 80% of the total dividends to be distributed in a single year. The final amount, type and percentage of the dividends are subject to the approval by the Board of Directors and shareholders based on actual earnings and capital requirements of the Corporation in a particular year.

A regulation issued by the Securities and Futures Bureau requires a special reserve be made from the unappropriated earnings, equivalent to the debit balance of any account shown in shareholders' equity. The special reserve appropriated will be reversed to the extent that the net debit balance reverses.

The appropriation of earnings should be resolved by the shareholders in the following year and given effect to in the financial statements of that year.

Under the Integrated Income Tax System, ROC resident shareholders are allowed a tax credit for the income tax paid by the Corporation. An imputation credit account (ICA) is maintained by the Corporation for such income tax and the tax credit allocated to each shareholder.

For the years ended December 31, 2009, the bonuses to employees and remuneration to directors and supervisors were accrued based on a respective 3% and 0.3% of net income (net of the bonus to employees and remuneration to directors and supervisors) after setting aside 10% net income as legal reserves. The significant difference between annual accruals and the amount approved by the Board shall be adjusted in the current year. If the Board of Directors' approval differs from the amount ratified at the annual general shareholders' meeting (AGM), the difference will be treated as changes in accounting estimation and will be adjusted in 2010's P&L. If employee bonuses are paid in the form of company shares, the number of employee bonus shares shall be derived from dividing the approved bonus amount by its closing price one day prior to the AGM, adjusted for cash and/or stock dividends if any.

The 2008 and 2007 earnings appropriations resolved by the AGMs on June 19, 2009 and June 13, 2008 were as follows:

	Appropriation of Earnings		Dividend Per Share	
	For Fiscal Year 2008	For Fiscal Year 2007	For Fiscal Year 2008	For Fiscal Year 2007
Appropriation of legal reserve	\$ 1,537,138	\$ 661,300

	<u>\$ 15,449,258</u>	<u>\$ 8,375,603</u>		

The shareholders on June 19, 2009 resolved to distribute 2008 bonus of \$414,697 thousand to employees and remuneration of \$41,470 thousand to directors and supervisors.

Information on the appropriation of the 2008 earnings, bonus and remuneration to employees, directors and supervisors proposed by Board of Directors and approved at 2009 AGM is available on the Market Observation Post System website of the Taiwan Stock Exchange.

c. Capital reduction by cash

To increase ROE (Return of Equity) and maintain stable EPS (Earnings per Share) and dividend, the Corporation's AGM resolved on June 15, 2007, a capital reduction of \$12,000,000 thousand, representing 2.4% of outstanding shares. The Corporation's Board of Directors resolved the record date of December 1, 2007, and completed the procedure for registration changes, which is already approved by the authority. Trading suspension period started from February 1 to 19, 2008, and new shares resumed trading from February 20, 2008.

1) Transfer of stock to employees

For the year ended December 31, 2009, the Corporation transferred 24,193 thousand shares bought back from the market to employees at \$43.8 per share, resulting in a reduction of \$3,254 thousand in capital surplus.

Under the Securities and Exchange Law, the buyback amount of treasury stock should not exceed 10% of total issued shares, and the buyback cost should not exceed the sum of the retained earnings, additional paid-in capital in excess of par value and realized capital surplus. In addition, the Corporation should not provide treasury stock as collateral and should not exercise shareholders' rights on those shares before transfer.

2) Shares held by subsidiaries

As of December 31, 2009, the carrying and market value of the Corporation's stocks held by TCCL, TID and TUI (all are the subsidiaries 100%-owned by the Corporation) were \$50,663,659 thousand. The Corporation reclassified \$31,889,100 thousand from investments accounted for using equity method to treasury stock based on SFAS No. 30, "Accounting for Treasury Stock". Although these shares are treated as treasury stock in the consolidated financial statements, the shareholders are entitled to exercise their rights on these shares, except for participation in capital injection by cash. In addition, based on the ROC Company Act, the shareholders of treasury stocks can not exercise the voting right.

In the first quarter of 2008, TFN sold 300,000 thousand shares of the Corporation for \$13,509,828 thousand. Disposal gain from the sales resulted in an increase in capital surplus by \$3,485,732 thousand. In addition, the Corporation's shares held by subsidiaries were reduced by 256,332 thousand shares due to the Corporation's capital reduction.

e. Unrealized gains or losses on financial instruments

Unrealized gains or losses on financial instruments for the years ended December 31, 2009 and 2008 were summarized as follows:

	Years Ended December 31	2008

c. Integrated income tax information was as follows:

	December 31	2008
Balance of imputation credit account (ICA)	\$ 2,990,179	\$ 2,797,888

As of December 31, 2009, there were no unappropriated earnings generated before January 1, 1998. The estimated creditable ratio for the 2009 earnings appropriation and the actual creditable ratio for the 2008 earnings appropriation were 32.17% and 35.28%, respectively.

The imputation credits allocated to the shareholders are based on the ICA balance as of the date of dividend distribution. The estimated creditable ratio for the 2009 earnings appropriation may be adjusted when the imputation credits are distributed.

d. The latest years through which income tax returns had been examined and cleared by the tax authorities were as follows:

	Year
The Corporation	2005
TAT	2007
The former TAT	Applicable
Mobitai	2006

The Corporation's income tax returns as of 2005 had been examined by the tax authorities. The Corporation filed for corrections of its 1999 through 2001 income tax returns. The Corporation also disagreed with the results on the income tax returns of 2002 through 2005 and had filed requests for reexamination.

TAT's income tax returns as of 2007 had been examined by the tax authorities. TAT disagreed with the examination results of the income tax returns and had requested a reexamination of the 2006 and 2007 income tax returns.

The former TAT's income tax returns as of 2006 had been examined by the tax authorities. The former TAT disagreed with the examination results of the 2002 and 2003 income tax returns and had filed an appeal, which is reviewed by the Supreme Court of the R.O.C. The former TAT also filed administrative proceedings for 2004 and 2005's income tax returns.

Mobitai's income tax returns as of 2006 had been ratified by the tax authorities. Mobitai disagreed with the result on the income tax returns and plans to apply for a reexamination of the 2006 income tax return.

The ARDF issued Interpretation No. 2007-052 that requires companies to recognize bonuses paid to employees and remunerations to directors and supervisors as compensation expenses beginning January 1, 2008. These bonuses and remunerations were previously recorded as appropriations from earnings. If the Corporation may settle the bonus to employees by cash or shares, the Corporation should presume that the entire amount of the bonus will be settled in shares and the potential share dilutions should be included in the weighted average number of shares outstanding used in the calculation of diluted EPS, if the shares have a dilutive effect. In the calculation of diluted EPS, the number of outstanding shares is derived from dividing the entire amount of the bonus by the closing price of the shares on the balance sheet date. Such potential dilutive effect should be taken into consideration in the calculation of diluted EPS until the shareholders resolved the actual number of shares to be distributed to employees at the AGM of the following year.

23. FINANCIAL INSTRUMENT TRANSACTIONS

a. Fair value information

	December 31	
	2009	2008
Non-derivative financial instruments	Carrying Value	Fair Value
Liabilities		
Bonds payable (including current portion)	\$ 8,000,000	\$ 8,373,376
		\$ 15,500,000
		\$ 15,621,815

b. The methods and significant assumptions applied in determining fair values of financial instruments were as follows:

- 1) Available-for-sale financial assets - based on quoted prices in an active market on the balance sheet date.
- 2) Because there is no active market and a reliable fair value could only be verified at a more than reasonable cost, the fair values of investments in unlisted stocks carried at cost, accounted for using equity method or prepayments for long-term investments can be measured by net worth of investee or estimate of the book value.
- 3) Bonds payable - based on the over-the-counter quotations in December.
- 4) Fair value of long-term loans - based on the present value of future cash flows discounted by the interest rates the Corporation may obtain for similar loans (e.g., similar maturities).
- 5) Derivative financial instruments - based on valuation results provided by banks. As of December 31, 2008, the financial instrument held by the Corporation was evaluated by the bid price of counter party.

6) The above financial instruments do not include cash and cash equivalents, notes and accounts receivables, pledged time deposits, refundable deposits, short-term borrowings, short-term notes and bills payable, notes and accounts payable and guarantee deposits. Because of the short maturities of these instruments, the carrying values represent a reasonable basis to estimate fair values.

c. The fair values of financial assets and liabilities were not simultaneously determined by quoted prices in active markets and by estimations using valuation technique.

d. The financial assets exposed to fair value interest rate risk amounted to \$522,139 thousand and \$1,002,425 thousand as of December 31, 2009 and 2008, respectively, and the financial liabilities exposed to fair value interest rate risk amounted to \$13,299,872 thousand and \$17,000,000 thousand as of December 31, 2009 and 2008, respectively. The financial assets exposed to cash flow interest rate risk amounted to \$509,232 thousand and \$595,637 thousand as of December 31, 2009 and 2008, respectively, and the financial liabilities exposed to cash flow interest rate risk amounted to \$0 thousand and \$5,000,000 thousand as of December 31, 2009 and 2008, respectively.

e. Information on financial risks:

1) Market risk

The Corporation didn't enter into any financial derivatives transactions, which will have big exposure to exchange rate and interest rate risks.

2) Credit risk

Credit risk represents the potential impacts to financial assets that the Corporation might encounter if counter-parties or third parties breach the contracts. Factors that affect the impacts include credit risk concentration, components of financial instruments, contract amount and other receivables. The Corporation's evaluation of credit risk exposure as of December 31, 2009 and 2008 were both zero because all of counter-parties are reputable financial institutions with good credit ratings.

The Corporation's maximum credit risk exposure of each financial instrument is the same as its carrying value.

The credit risk amount listed above is an evaluation over the contracts with positive fair value at the balance sheet date and the contracts of off-balance-sheet commitments and guarantees. Significant concentration of credit risk exists when counter-parties in financial instrument transactions significantly concentrate on one individual, or when there are a number of counter-parties in financial instrument transactions, but these counter-parties are engaged in similar business activities and have similar economic characteristics so that their abilities to perform contractual obligations would be concurrently affected in similar economic changes or other situations. The characteristics of credit risk concentration include the nature of the debtors' operating activities. The Corporation does not rely significantly on single transaction and transact with single client or in the same region.

3) Liquidity risk

The Corporation's operating funds are deemed sufficient to meet the cash flow demand, therefore, liquidity risk is not considered to be significant.

**Consolidated Financial Statements for the
Years Ended December 31, 2009 and 2008 and
Independent Auditors' Report**

INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders
Taiwan Mobile Co., Ltd.

We have audited the accompanying consolidated balance sheets of Taiwan Mobile Co., Ltd. (the "Corporation") and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Taiwan Mobile Co., Ltd. and subsidiaries as of December 31, 2009 and 2008, and the consolidated results of its operations and its consolidated cash flows for the years then ended, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

As stated in Note 3 to the consolidated financial statements, in March 2007, the Accounting Research and Development Foundation issued an interpretation that requires companies to recognize employees' bonuses and remuneration paid to directors and supervisors as expenses starting from January 1, 2008. The mentioned bonuses and remuneration were previously recorded as appropriations from earnings.

January 20, 2010

Notice to Readers

The accompanying consolidated financial statements are intended only to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to audit such consolidated financial statements are those generally accepted and applied in the Republic of China.

For the convenience of readers, the auditors' report and the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the Republic of China. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language auditors' report and consolidated financial statements shall prevail.

TAIWAN MOBILE CO., LTD. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS YEARS ENDED DECEMBER 31, 2009 AND 2008 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise)

1. ORGANIZATION AND OPERATIONS

Taiwan Mobile Co., Ltd. was incorporated in the Republic of China (ROC) on February 25, 1997. The Corporation's shares began trading on the ROC Over-the-Counter Securities Exchange (known as Gre Tai Securities Market) on September 19, 2000. On August 26, 2002, the Corporation's shares were listed on the Taiwan Stock Exchange. The Corporation mainly renders wireless communication services.

The Corporation's services are under the type 1 license issued by the Directorate General of Telecommunications (DGT) of the ROC. The license allows the Corporation to provide services for 15 years from 1997 onwards. It also entails the payment of an annual license fee consisting of 2% of total wireless communication service revenues. On March 24, 2005, the Corporation received the third generation (3G) concession operation license issued by the DGT. The 3G license allows the Corporation to provide services from the issuance date of the license to December 31, 2018.

As of December 31, 2009 and 2008, the Corporation and subsidiaries had 4,416 and 4,552 employees, respectively.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the ROC. In conformity with these guidelines and principles, the Corporation and subsidiaries (hereinafter referred to as the "Group") are required to make certain estimates and assumptions that could affect the amounts of allowance for doubtful accounts, provision for losses on decline in value of inventories, depreciation, pension, allowance for deferred income tax assets, bonus to employees, remuneration to directors and supervisors, impairment loss on assets, etc. Actual results may differ from these estimates.

For the convenience of readers, the accompanying consolidated financial statements have been translated into English from the original Chinese version prepared and used in the ROC. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language consolidated financial statements shall prevail.

Consolidation

a. Basis of consolidation

The consolidated financial statements have been prepared in accordance with the Statement of Financial Accounting Standards (SFAS) No. 7, "Consolidated Financial Statements," and included the financial statements of the Corporation, its direct and indirect subsidiaries with at least 50% shareholding and other investees controlled by the Corporation. As obtaining the majority of the shareholder's equity of the subsidiaries during the year, the company starts to consolidate the related revenues and expenses of the subsidiaries since the date of having the controlling interest.

For foreign subsidiaries using their local currency as their functional currency, assets and liabilities are translated at exchange rates in effect on the balance sheet date; shareholders' equity accounts are translated using historical exchange rates and income statement accounts are translated using average exchange rates during the period.

All significant intercompany balances and transactions have been eliminated upon consolidation.

b. Under the above basis of consolidation, the consolidated entities were as follows:

Note 1: To expand its CATV business, the Corporation's 100%-owned subsidiary, WMT, plans to buy a 100% stake in Cheng Ting Co., Ltd. to acquire all the cable TV and content distribution business of Kbro Co., Ltd. The purchase will be settled using the Corporation's treasury shares (up to 15.5% of total outstanding shares), and the remainder in cash. The Corporation expects to close the deal after obtaining the authorities' approval.

Note 2: Became a subsidiary of TCCI, which merged TFNI on September 19, 2009.

Note 3: Became a subsidiary of TFN, which merged TTN on August 1, 2008.

Note 4: Became a subsidiary of TT&T, which merged the former TT&T on September 1, 2008.

The Group's significant accounting policies are summarized as follows:

Classification of Current and Non-current Assets and Liabilities

Current assets include cash and cash equivalents, assets held for trading and those expected to be converted to cash, sold or consumed within twelve months from the balance sheet date. Other assets, such as property and equipment and intangible assets are classified as non-current. Current liabilities are obligations held for trading and those expected to be due within twelve months from the balance sheet date. All other liabilities are classified as non-current.

Cash Equivalents

Government bonds and short-term bills acquired with repurchase rights and having maturities of up to three months from the date of purchase are classified as cash equivalents, whose carrying value approximates fair value.

Financial Instruments at Fair Value through Profit or Loss

Financial instruments at fair value through profit or loss include financial assets or liabilities held for trading and those designated on initial recognition to be measured at fair value with fair value changes recognized in profit or loss. On initial recognition, the financial instruments are recognized at fair value plus transaction costs and are subsequently measured at fair value with fair value changes recognized in profit or loss. The purchase or sale of the financial instruments is recognized and derecognized using trade date accounting.

The fair value of open-end mutual funds is based on the net assets value on the balance sheet date.

Available-for-sale Financial Assets

On initial recognition, available-for-sale financial assets are recognized at fair value plus transaction costs. When subsequently measured at fair value, the fair value changes are recognized directly in equity. The cumulative gain or loss that was recognized in equity is recognized in profit or loss when an available-for-sale financial asset is derecognized from the balance sheet. The purchase or sale of the financial instruments is recognized and derecognized using trade date accounting.

Cash dividends are recognized as dividend income on the ex-dividend date, but are accounted for as reductions to the original cost of investments if such dividends are declared on the earnings of investees attributable to periods prior to the purchase of investments. Stock dividends are not recognized as current income but are accounted for only as an increase in the number of shares held. The cost per share is re-calculated based on the new number of shares.

An impairment loss is recognized if there is objective evidence that a financial asset is impaired. If the amount of impairment loss decreases in the subsequent period, such decrease is recognized in equity.

The fair value of listed securities is based on the closing price on the balance sheet date.

Allowance for Doubtful Accounts

Allowance for doubtful accounts is provided on the basis of past experiences and an evaluation of the aging and collectibility of all receivables on the balance sheet date.

Inventories

Inventories are recorded at weighted-average cost. Before January 1, 2009, inventories are stated at the lower of the cost or market value. Market value is evaluated on the basis of replacement cost or net realizable value. Effective from January 1, 2009, however, inventories are stated at the lower of cost or net realizable value. When comparing cost and net realizable value, inventories are evaluated by individual items.

Investments Accounted for Using the Equity Method

Long-term investments in which the Group owns 20% or more of an investee's outstanding voting shares or exercise significant influence on an investee are accounted for under equity method.

In accordance with the newly revised Statement of Financial Accounting Standards (SFAS), the cost of acquisition is subjected to an initial analysis, and goodwill represents the excess of the cost of acquisition over the fair value of the identifiable net assets value. Goodwill is no longer amortized. If the fair value of identifiable net assets acquired exceeds the cost of investments, the excess should be assigned to non-current assets (except for financial assets not under the equity method, assets for disposal, deferred income tax assets and prepaid pension costs or other retirement benefit costs). If these assets are all reduced to zero, the remaining excess should be recognized as extraordinary gain. Starting January 1, 2006, the unamortized balance of the excess of the acquisition cost of the long-term investment by the equity method over the equity in the investee's net assets value is also no longer amortized and applies the same accounting treatment as goodwill.

The cost and the resulting gain or loss of an investment sold is determined by the weighted-average method.

Financial Assets Carried at Cost

If there is no active market for an equity instrument and a reliable fair value cannot be estimated, the equity instrument, including non-publicly traded and emerging stocks, etc, is measured at cost. The accounting for the dividends from financial assets carried at cost is the same as that for an available-for-sale financial assets. Impairment losses are recognized if a decrease in fair value of the instruments can be objectively related to an event. Reversal of impairment losses is not allowed.

Bonds Measured at Amortized Cost

Bond portfolios with fixed or determinable payments and with no quoted prices in an active market are carried at amortized cost using the effective interest method. These bond portfolios are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition or the issuance of the financial assets. Profit or loss is recognized at the time of derecognized, impairment or amortization. A regular purchase or sale of financial assets is recognized and de-recognized using trade date accounting.

If there is objective evidence of impairment loss as of the balance sheet date, impairment loss should be recognized. If the impairment loss decreases and the decrease can be related objectively to an event occurring after impairment loss recognition, the impairment loss should be reversed. This reversal should not result in the carrying amount of the financial asset exceeding the amortized cost that would have been determined had no impairment loss been recognized.

Property and Equipment and Assets Leased to Others

Property and equipment and assets leased to others are stated at cost less accumulated depreciation and accumulated impairment. Significant additions, renewals, betterments, and interest expenses incurred during the construction period are capitalized, while maintenance and repairs are expensed. Leased property and equipment from others covered by agreements qualifying as capital leases are carried at the lower of the present value of future minimum lease payments or the market value of the property on the starting dates of the leases.

d. Customer relationship and operating rights

The customer relationship and operating rights shall be identified when analyzing the excess of acquisition cost over the ownership in net assets value of an investee, and be booked at fair values provided by the purchase price allocation report.

Customer relationship and operating rights are measured on the basis of the future economic value and useful life of the subsidiaries' cable TV and data network businesses. Customer relationship is amortized by straight-line method over 6 to 20 years. Operating rights is based on a license issued by the Ministry of Transportation and Communications. Although the license has a statutory period, the subsidiary can file for license renewal. Furthermore, it does not have a definite useful life in light of future competition from IPTV. Thus, this intangible asset should be tested annually for impairment instead of being amortized in accordance with SFAS No. 37. An impairment test is also required if there is evidence of goodwill impairment due to certain circumstances.

Idle Assets

Properties not currently used in operations are stated at the lower of book value or net realizable value, with the difference charged to current loss. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets.

Deferred Charges

Deferred charges, mainly interior decoration costs, are amortized by the straight-line method over 3 to 7 years.

Asset Impairment

If the carrying value of assets (including property and equipment, intangible assets, idle assets, assets leased to others and investments accounted for using equity method and deferred charges) is more than its recoverable amount, which indicates that an impairment exists, an impairment loss should be recognized. Any subsequent reversal of the impairment loss for the increase in recoverable amount is recognized as income. The reversal of impairment loss on goodwill is not allowed.

Share-based Compensation

For the grant date of the employee stock options which falls on or after January 1, 2008 should apply SFAS No. 39 - "Accounting for Share-based Payment". The value of stock option granted, the product of the number of vested stock options multiplies by the fair value of the option on grant date, shall be expensed over the vesting period, and to increase "capital surplus - employee stock options" by the same amount accordingly.

Pension Costs

The pension costs under the defined benefit pension plan are recognized on the basis of actuarial calculations. The contribution amounts of the pension costs under the defined contribution pension plan are recognized as current expenses during the employees' service years.

For cost associated with dismantling and relocating fixed assets and restoring the leased premises housing our fixed assets to the previous state should be recognized as an addition to the fixed assets and accrued as a potential liability accordingly, according to the Accounting Research and Development Foundation (ARD) issued the Interpretation No. 2008-340 in November 2008.

Depreciation is calculated using the straight-line method over the estimated service lives, which range as follows: buildings - 20 to 55 years; telecommunication equipment - 2 to 15 years; office equipment - 3 to 8 years; leased assets - 20 years; and miscellaneous equipment - 2 to 9 years.

Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to non-operating gain or loss in the period of disposal.

Accounting for Leases

In accordance with SFAS No. 2, "Accounting for Leases," a lease is identified as either an operating lease or a capital lease based on the lease contract terms, the collectability of the leasehold and the non-reimbursable costs to be incurred by the lessor.

The asset held under an operating lease is stated at cost, and depreciated on the straight-line basis over the estimated useful life. Receivables collected are periodically recognized as rental income during the lease contract.

At the inception date of a capital lease, total leasehold receivables shall be recognized as all rental receivables plus the pre-determined bargain purchase price offered to the lessee upon maturity or estimated residual value. For a sales-type capital lease, sales revenue should be recognized as the sum of present value derived from each future rental receivable based on an implicit interest rate of the lease. The excess of total leasehold receivables over sales revenue should be deferred as unrealized interest income, and amortized as interest income by the effective interest method upon each collection. For a financing-type capital lease, leasehold receivables should be recognized as the sum of present value derived from each future rental receivable based on an implicit interest rate of the lease. The excess of total leasehold receivables over the present value of leasehold receivables should be deferred as unrealized interest income, and amortized as interest income by the effective interest method upon each collection.

Intangible Assets

- a. Franchise
Franchise refers to the payment for the 3G mobile telecommunication service - License C. The 3G concession is recorded at acquisition cost and is amortized by the straight-line method over 13 years and 9 months starting from the launch of 3G services.
- b. Computer software
Computer software cost is amortized by the straight-line method over 2 to 5 years.
- c. Goodwill
Goodwill is the unidentifiable difference between the cost of acquisition and the equity in the investee's net asset value. In accordance with the newly revised SFAS, goodwill is no longer amortized. Please refer to the accounting policy of investments accounted for by the equity method.

Income Taxes

The inter-period and intra-period allocation methods are used for income taxes. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits and net operating loss carry forwards. Valuation allowance is provided for deferred income tax assets to the extent that more likely than not such assets will not be realized. Deferred tax assets or liabilities are classified as current or non-current according to the classification of related assets or liabilities for financial reporting. However, if deferred tax assets or liabilities do not relate to assets or liabilities in the financial statements, they are classified as current or non-current on the basis of the expected length of time before realized.

Tax credits for certain purchases of equipment and technology, research and development expenditures and personnel training are recognized by the current method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax expense.

Income tax of 10% on unappropriated earnings generated is provided for as income tax in the year when the shareholders resolve to retain the earnings.

Treasury Stock

The purchase of issued shares is accounted for by debiting treasury stock, which is a reduction of shareholders' equity. The Corporation's shares held by its subsidiaries are treated as treasury stock and reclassified from investments accounted for using equity method to treasury stock.

If the proceeds on the disposal of treasury stock exceed the carrying value of treasury stock, the excess is credited to capital surplus from treasury stock. If the proceeds are less than the carrying value of treasury stock, the difference is debited to capital surplus from treasury stock. If the balance of capital surplus from treasury stock is not sufficient to absorb the difference, the rest is recorded as a reduction of retained earnings.

Foreign-currency Transactions

Assets, liabilities, revenues or expenses denominated in foreign currencies as a result of foreign-currency transactions of non-derivative financial instruments are recorded in New Taiwan dollars at the exchange rates prevailing on the dates of transactions.

Monetary assets or liabilities denominated in foreign currencies are translated at the exchange rates prevailing on the balance sheet date, and the resulting exchange differences are included in profit or loss for the current year.

Non-monetary assets or liabilities carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date when the fair value was determined, and the resulting exchange differences are included in profit or loss for the current year except for the differences arising on the retranslation of non-monetary assets and liabilities in respect of which gains and losses are recognized directly in equity. For such non-monetary assets and liabilities, any exchange component of that gain or loss is also recognized directly in equity. Non-monetary assets or liabilities carried at cost that are denominated in foreign currencies are translated at the historical rates prevailing on the dates of transactions.

The above prevailing exchange rates are based on the average of bid and ask rates of principal banks.

Revenue Recognition

Revenues are recognized when the service rendering process is completed or virtually completed, and earnings are realizable and measurable. Related costs of providing services are concurrently recognized as incurred.

Service revenues from wireless services, value-added services, and fixed network services, net of any applicable discount, are billed at predetermined rates; the fixed-monthly fees on basic cable TV services are accrued; prepaid card service are recognized on the basis of minutes of usage.

Promotion Expenses

Commissions and cellular phone subsidy costs pertaining to the Corporation's promotions are recognized as marketing expenses on an accrual basis in the current year.

Hedging Derivative Financial Instruments

Derivatives that qualify as effective hedging instruments are measured at fair value, with subsequent changes in fair value recognized either in earning or shareholders' equity, depending on the nature of the hedge.

Hedge Accounting

When hedge accounting is applied, gain or loss from changes in the fair value of the derivatives (hedging instruments) shall be offset by that of financial assets/liabilities (hedged position).

The Corporation entered into interest rate swaps (IRS) contracts to hedge against cash flow risk from inverse floating interest rates of liabilities, thus was qualified to apply hedge accounting. The accounting treatment is as follows: Gain or loss from changes in the fair value of the derivatives, which is recognized in shareholder's equity, shall be reclassified in earnings, if gain or loss from the expected transaction of the hedged position occurs. When there is objective evidence that the net loss recognized in shareholders' equity is expected to be not recoverable, the mentioned net loss should be reclassified in earnings as well.

Reclassification

Certain accounts in the consolidated financial statements as of and for the year ended December 31, 2008 have been reclassified to conform to the presentation of consolidated financial statements as of and for the year ended December 31, 2009.

3. REASONS AND EFFECT OF CHANGES IN ACCOUNTING PRINCIPLES

In March 2007, the ARDF issued an interpretation that requires companies and their subsidiaries to recognize those bonuses to employees and remunerations to directors and supervisors as compensation expenses starting from January 1, 2008. The mentioned bonuses and remunerations were previously recorded as appropriations from earnings. The adoption of this interpretation resulted in a decrease of \$343,629 thousand in consolidated net income and a decrease in basic earnings per share of NT\$0.12 for the year ended December 31, 2008.

For the year ended December 31, 2008, the Corporation and its subsidiaries entered into an accounts receivable factoring contract with HC Second Asset Management Co., Ltd. The Corporation and its subsidiaries sold \$5,188,398 thousand of the overdue accounts receivable, which had been written off, to HC Second Asset Management Co., Ltd. The aggregate selling price was \$60,525 thousand. Under this contract, the Corporation and its subsidiaries would no longer assume the risk on this receivable.

7. INVESTMENTS ACCOUNTED FOR USING THE EQUITY METHOD

Taipei New Horizons Co., Ltd. (TNH) is established to invest in a property development project located in the old Songshan Tobacco Factory site. On January 15, 2009, TNH signed a 50-year BOT contract with Taipei City Government.

The Corporation established TNH on December 31, 2008 with initial investment of \$249,500 thousand, representing 49.9% ownership. Investment loss was \$37,526 thousand for the year ended December 31, 2009 based on the audited financial statements of TNH.

a. Customer relationship and operating rights

Under SFAS No. 25 - "Accounting for Business Combinations" and No. 37 - "Accounting for Intangible Assets"; the Group should measure the fair value of the acquired assets and identify major intangible assets as well as the amortization periods.

- 1) On April 17, 2007, TFN, the Corporation's 100%-owned subsidiary, acquired more than 50% of the former TFN through a public tender offer at the price of NT\$88.3 per share. The Corporation divided the former TFN and its subsidiaries into two cash-generating units, fixed network service and cable TV. Accordingly, customer relationship and operating rights are identified as major intangible assets.
- 2) On September 2007, TUC, the Corporation's 100%-owned subsidiary, acquired more than 50% of TTN's shares at NT\$13.843 per share. The Corporation measured the fair value of the acquired assets, and viewed TTN's ISP services as one cash-generating unit. Accordingly, customer relationship is identified as major intangible asset.

b. Goodwill

In conformity with SFAS No. 35, "Accounting for Asset Impairment," the Group identified the smallest identifiable group of cash-generating units by years and entities as follows:

The Group's members, which were engaged in mobile or wireless phone services, fixed network services and the cable television business, were viewed as separate, independent cash-generating units. Thus, the recoverable amounts of the operating assets and goodwill were evaluated by business type, and the critical assumptions used for this evaluation were as follows:

- 1) Wireless service
 - a) Assumptions on operating revenues
After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers, minutes of incoming and outgoing calls and average revenue per minute.
 - b) Assumptions on operating costs and expenses
The estimates of commissions, customer retention costs, customer service costs and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2009 and 2008 financial statements.
 - c) Assumptions on discount rate
In 2009 and 2008, the discount rate used to calculate the asset recoverable amounts of the Corporation was 8.50% and 7.48% respectively.
- 2) Fixed network service
 - a) Assumptions on operating revenues
After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers, the types of data transmission, bandwidth on demand, minutes of incoming and outgoing calls and average revenue per minute.
 - b) Assumptions on operating costs and expenses.
The costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2009 and 2008 financial statements.
 - c) Assumptions on discount rate
In 2009 and 2008, the discount rate was 8.31% and 7.60%, respectively, in calculating the asset recoverable amounts of TTFN.
- 3) Cable television business
 - a) Assumptions on operating revenues
After taking changes in the cable television industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers and average revenue per subscriber.

b) Assumptions on operating costs and expenses

The estimates of copyright costs, network maintenance costs, customer service costs and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2009 and 2008 financial statements.

c) Assumptions on discount rate

The discount rate used to calculate the asset recoverable amounts for each System Operation was ranging from 2.90% to 6.42% and from 3.21% to 5.92% in 2009 and 2008, respectively.

Based on the key assumptions of each cash-generating unit, the Group's management believes that the carrying amounts of these assets for operating and goodwill will not exceed their recoverable amounts even if there are changes in the critical assumptions used to estimate recoverable amounts as long as these changes are reasonable for the years ended December 31, 2009 and 2008.

The Corporation entered into a contract with Mega International Commercial Bank Co., Ltd., which provided performance guarantee for advance receipts from prepaid card customers in accordance with NCC's new policy effective on April 1, 2007. The guaranteed advance receipts from prepaid card customers were \$832,908 thousand as of December 31, 2009.

TFN, the Corporation's subsidiary, entered into a contract with Mega International Commercial Bank Co., Ltd., which provided performance guarantee for advance receipts from IDD calling card customers in accordance with NCC's new policy effective on April 1, 2007. The Corporation also bears the repayment liability with respect to TFN's drawdown from its credit line with Mega Bank. The guaranteed advance receipts from above-mentioned IDD calling card customers were \$48,322 thousand as of December 31, 2009.

Type II	2,500,000	5.21%-6M LIBOR	Repayment on maturity date, interest payable semiannually

(Continued)

The Labor Standards Act (LSA) provides for a defined benefit pension plan. Benefits are based on the length of service and average basic pay of the six months before retirement. The Group contributes monthly an amount equal to 2% of the employees' monthly wages to a pension fund. The pension fund is managed by an independently administered pension fund committee and deposited in the committee's name in the Bank of Taiwan (formerly the Central Trust of China, which was merged into the Bank of Taiwan in July 2007). Approved by Department of Labor of Taipei City Government, the Corporation suspended contributing from February 2007 to January 2010.

To provide medium-term working capital, the Corporation and its subsidiary, TFN, entered into a syndicated loan with a joint credit line of \$13,500,000 thousand with 9 banks led by Chinatrust Commercial Bank on February 21, 2008. The tenor is three years starting from May 20, 2008. Based on contract term, interests are payable monthly and the principal is due upon maturity. Upon maturity, the loan is allowed to revolve within its credit limits. The contract requires the Corporation to maintain certain financial ratio including debt ratios, interest coverage, and tangible net asset ratio based on semi-annual financials. The Corporation also bears the repayment liability with respect to TFN's borrowing. Please refer to Note 26 for further information.

18. PENSION PLAN

The Labor Pension Act (LPA) provides for a defined contribution pension plan. Starting from July 1, 2005, the Group should contribute monthly an amount equal to 6% of the employees' monthly wages to the employees' individual pension accounts. The contributed amount was \$172,910 thousand and \$174,989 thousand for the years ended December 31, 2009 and 2008, respectively.

19. SHAREHOLDERS' EQUITY

a. Capital surplus

Under the Company Act, capital surplus may only be used to offset a deficit. However, capital surplus generated from the excess of the issue price over the par value of capital stock, including the stock issued for new capital and the buyback of treasury stock, may be transferred to capital as stock dividends, and this transfer is restricted to a certain percentage of the capital surplus and may be made only within prescribed limits each time. Also, the capital surplus from long-term investments may not be used for any purpose.

b. Appropriation of earnings and dividend policy

The Corporation's Articles of Incorporation provide that a 10% legal reserve should be set aside from the annual net income after the reduction of accumulated deficit. The remainder, less special reserve based on relevant laws or regulations or business requirements, should be distributed as follows:

- 1) Dividends and bonus to preferred shareholders.
- 2) Remuneration to directors and supervisors - up to 0.3%.
- 3) Bonus to employees - 1%-3%.
- 4) Remainder, to be appropriated as dividends as determined in the shareholders' meeting.

The Corporation's dividend distribution is based on the availability of excess funds. That is, the Corporation first projects future capital needs through a capital budgeting process and then provides for the projected capital needs by using retained earnings. Any remainder is available for dividend distribution. However, the amount of stock dividends should not be more than 80% of the total dividends to be distributed in a single year. The final amount, type and percentage of the dividends are subject to the approval by the Board of Directors and shareholders based on actual earnings and capital requirements of the Corporation in a particular year.

A regulation issued by the Securities and Futures Bureau requires a special reserve be made from the unappropriated earnings, equivalent to the debit balance of any account shown in shareholders' equity. The special reserve appropriated will be reversed to the extent that the net debit balance reverses.

The appropriation of earnings should be resolved by the shareholders in the following year and given effect to in the financial statements of that year.

Under the Integrated Income Tax System, ROC resident shareholders are allowed a tax credit for the income tax paid by the Corporation. An imputation credit account (ICA) is maintained by the Corporation for such income tax and the tax credit allocated to each shareholder.

For the year ended December 31, 2009, the bonuses to employees and remuneration to directors and supervisors were accrued based on a respective 3% and 0.3% of net income (net of the bonus to employees and remuneration to directors and supervisors) after setting aside 10% net income as legal reserves. The significant difference between annual accruals and the amount approved by the Board shall be adjusted in the current year. If the Board of Directors' approval differs from the amount ratified at the annual general shareholders' meeting (AGM), the difference will be treated as changes in accounting estimation and will be adjusted in 2010 P&L. If employee bonuses are paid in the form of company shares, the number of employee bonus shares shall be derived from dividing the approved bonus amount by its closing price one day prior to the AGM, adjusted for cash and/or stock dividends if any.

The 2008 and 2007 earnings appropriations resolved by the AGMs on June 19, 2009 and June 13, 2008 were as follows:

	Appropriation of Earnings For Fiscal		Dividend Per Share (NT\$) For Fiscal	
	Year 2008	Year 2007	Year 2008	Year 2007
Appropriation of legal reserve	\$ 1,537,138	\$ 661,300

Remuneration to directors and supervisors	-	18,116		
Cash bonus to employees	-	181,155		\$2,54326
Cash dividends	<u>13,968,864</u>	<u>7,601,851</u>	\$4,68704	
	<u>\$ 15,449,258</u>	<u>\$ 8,375,603</u>		

The shareholders on June 19, 2009 resolved to distribute 2008 bonus of \$414,697 thousand to employees and remuneration of \$41,470 thousand to directors and supervisors.

Information on the appropriation of the 2008 earnings, bonus and remuneration to employees, directors and supervisors proposed by the Board of Directors and approved at 2009 AGM is available on the Market Observation Post System website of the Taiwan Stock Exchange.

c. Capital reduction by cash

To increase ROE (Return of Equity) and maintain stable EPS (Earnings per Share) and dividend, the Corporation's AGM resolved on June 15, 2007, a capital reduction of \$12,000,000 thousand, representing 24% of outstanding shares. The Corporation's Board of Directors resolved the record date of December 1, 2007, and completed the procedure for registration changes, which is already approved by the authority. Trading suspension period started from February 1 to 19, 2008, and new shares resumed trading from February 20, 2008.

Note: Shares held before capital reduction.

1) Transfer of stock to employees

For the year ended December 31, 2009, the Corporation transferred 24,193 thousand shares bought back from the market to employees at NT\$43.8 per share, resulting in a reduction of \$3,254 thousand in capital surplus.

Under the Securities and Exchange Law, the buyback amount of treasury stock should not exceed 10% of total issued shares, and the buyback cost should not exceed the sum of the retained earnings, additional paid-in capital in excess of par value and realized capital surplus. In addition, the Corporation should not provide treasury stock as collateral and should not exercise shareholders' rights on those shares before transfer.

2) Shares held by subsidiaries

As of December 31, 2009, the carrying and market value of the Corporation's stocks held by TCCI, TID and TUJ (all are subsidiaries 100%-owned by the Corporation) were \$50,663,659 thousand. The Corporation reclassified \$31,889,100 thousand from investments accounted for using equity method to treasury stock based on SFAS No. 30, "Accounting for Treasury Stock". Although these shares are treated as treasury stock in the consolidated financial statements, the shareholders are entitled to exercise their rights on these shares, except for participation in capital injection by cash. In addition, based on the ROC Company Act, the shareholders of treasury stocks can not exercise the voting right.

In the first quarter of 2008, TFN sold 300,000 thousand shares of the Corporation for \$13,509,828 thousand. Disposal gain from the sales resulted in an increase in capital surplus by \$3,485,732 thousand. In addition, the Corporation's shares held by subsidiaries were reduced by 256,332 thousand shares due to the Corporation's capital reduction.

The Corporation's income tax returns as of 2005 had been examined by the tax authorities. The Corporation filed for corrections of its 1999 through 2001 income tax returns. The Corporation also disagreed with the results on the income tax returns of 2002 through 2005 and had filed requests for reexamination.

TAT's income tax returns as of 2007 had been examined by the tax authorities. TAT disagreed with the examination results of the income tax returns and had requested a reexamination of the 2006 and 2007 income tax returns.

The former TAT's income tax returns as of 2006 had been examined by the tax authorities. The former TAT disagreed with the examination results of the 2002 and 2003 income tax returns and had filed an appeal, which is reviewed by the Supreme Court of the R.O.C. The former TAT also filed administrative proceedings for 2004 and 2005's income tax returns.

Mobitai's income tax returns as of 2006 had been ratified by the tax authorities. Mobitai disagreed with the result on the income tax returns and plans to apply for a reexamination of the 2006 income tax return.

TFNM's income tax returns as of 2006 had been examined by the tax authorities. However, TFNM disagreed with the examination result on the 2006 income tax return and requested a reexamination of the 2006 income tax return.

The ARDF issued Interpretation No. 2007-052 that requires companies to recognize bonuses paid to employees and remunerations to directors and supervisors as compensation expenses beginning January 1, 2008. These bonuses and remunerations were previously recorded as appropriations from earnings. If the Corporation may settle the bonus to employees by cash or shares, the Corporation should presume that the entire amount of the bonus will be settled in shares and the potential share dilutions should be included in the weighted average number of shares outstanding used in the calculation of diluted EPS, if the shares have a dilutive effect. In the calculation of diluted EPS, the number of outstanding shares is derived from dividing the entire amount of the bonus by the closing price of the shares on the balance sheet date. Such potential dilutive effect should be taken into consideration in the calculation of diluted EPS until the shareholders resolved the actual number of shares to be distributed to employees at the AGM of the following year.

23. FINANCIAL INSTRUMENT TRANSACTIONS

a. Fair value information

	December 31	
	2009	2008
	Carrying Value	Fair Value
Non-derivative financial instruments		
Liabilities		
Bonds payable (including current portion)	\$ 8,000,000	\$ 8,373,376
		\$ 15,500,000
		\$ 15,621,815

b. The methods and significant assumptions applied in determining fair values of financial instruments were as follows:

- 1) Available-for-sale financial assets - based on quoted prices in an active market on the balance sheet date.
- 2) Because there is no active market and a reliable fair value could only be verified at a more than reasonable cost, the investments accounted for using equity method, prepayment for long-term investments, financial assets carried at cost or bonds investment with no active market can be measured by the net worth of the investees' or the estimated book value.
- 3) Bonds payable - based on the over-the-counter quotations in December.
- 4) Fair value of long-term loans - based on the present value of future cash flows discounted by the interest rates the Corporation may obtain for similar loans (e.g., similar maturities).
- 5) Derivative financial instruments - based on valuation results provided by banks. As of December 31, 2008, the financial instrument held by the Corporation was evaluated by the bid price of counter party.

6) The above financial instruments do not include cash and cash equivalents, notes and accounts receivables, pledged time deposits, refundable deposits, short-term borrowings, short-term notes and bills payable, notes and accounts payable and guarantee deposits. Because of the short maturities of these instruments, the carrying values represent a reasonable basis to estimate fair values.

c. The fair values of financial assets and liabilities were not simultaneously determined by quoted prices in active markets and by estimations using valuation technique.

d. The financial assets exposed to fair value interest rate risk amounted to \$2,006,775 thousand and \$2,764,594 thousand as of December 31, 2009 and 2008, respectively, and the financial liabilities exposed to fair value interest rate risk amounted to \$15,599,638 thousand and \$15,700,000 thousand as of December 31, 2009 and 2008, respectively. The financial assets exposed to cash flow interest rate risk amounted to \$975,905 thousand and \$1,173,229 thousand as of December 31, 2009 and 2008, respectively, and the financial liabilities exposed to cash flow interest rate risk amounted to \$0 thousand and \$5,000,000 thousand as of December 31, 2009 and 2008, respectively.

e. Information on financial risks:

1) Market risk

The Group didn't enter into any financial derivatives transactions, which will have big exposure to exchange rate and interest rate risks.

2) Credit risk

Credit risk represents the potential impacts to financial assets that the Group might encounter if counter-parties or third parties breach the contracts. Factors that affect the impacts include credit risk concentration, components of financial instruments, contract amount and other receivables. The Group's evaluation of credit risk exposure as of December 31, 2009 and 2008 were both zero because all of counter-parties are reputable financial institutions with good credit ratings.

The Group's maximum credit risk exposure of each financial instrument is the same as its carrying value.

The credit risk amount listed above is an evaluation over the contracts with positive fair value at the balance sheet date and the contracts of off-balance-sheet commitments and guarantees. Significant concentration of credit risk exists when counter-parties in financial instrument transactions significantly concentrate on one individual, or when there are a number of counter-parties in financial instrument transactions, but these counter-parties are engaged in similar business activities and have similar economic characteristics so that their abilities to perform contractual obligations would be concurrently affected in similar economic changes or other situations. The characteristics of credit risk concentration include the nature of the debtors' operating activities. The Group does not rely significantly on single transaction and transact with single client or in the same region.

3) Liquidity risk

The Group's operating funds are deemed sufficient to meet the cash flow demand, therefore, liquidity risk is not considered to be significant.
