**Consolidated Financial Statements for the  
Years Ended December 31, 2007 and 2006 and  
Independent Auditors' Report**

## INDEPENDENT AUDITORS' REPORT

The Board of Directors and Shareholders  
Taiwan Mobile Co., Ltd.

We have audited the accompanying consolidated balance sheets of Taiwan Mobile Co., Ltd. (the "Corporation") and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the years then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to issue a report based on our audits.

We conducted our audits in accordance with the Rules Governing the Audit of Financial Statements by Certified Public Accountants and auditing standards generally accepted in the Republic of China. Those rules and standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Taiwan Mobile Co., Ltd. and subsidiaries as of December 31, 2007 and 2006, and the consolidated results of their operations and their consolidated cash flows for the years then ended, in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, requirements of the Business Accounting Law and Guidelines Governing Business Accounting relevant to financial accounting standards, and accounting principles generally accepted in the Republic of China.

As stated in Note 2 to the consolidated financial statements, to position as an integrated telecom and media player down the road differentiating from competition and build growth momentum through exposure to higher margin lines of business, Taiwan Fixed Network., Ltd. (the former Taihsing International Telecommunications Co., Ltd.), the subsidiary of the Corporation, acquired up to 84.03% of Taiwan Fixed Network., Ltd. (the former TFN)'s shares since April 17, 2007. Because the former TFN is controlled by the Corporation, the former TFN and its subsidiaries have been included in the accompanying consolidated financial statements for the period from April 17, 2007 to December 31, 2007.

As stated in Note 3 to the financial statements, on January 1, 2006, the Corporation adopted the newly issued Statement of Financial Accounting Standards (SFAS) No. 34, "Accounting for Financial Instruments" No. 36, "Disclosure and Presentation of Financial Instruments" and the revisions of previously released statements, which were amended to harmonizing with SFAS No. 34 and 36.

#### 1. ORGANIZATION AND OPERATIONS

Taiwan Mobile Co., Ltd. was incorporated in the Republic of China (ROC) on February 25, 1997. The Corporation's shares began to be traded on the ROC Over-the-Counter Securities Exchange (known as GreTai Securities Market) on September 19, 2000. On August 26, 2002, the Corporation's shares were listed on the Taiwan Stock Exchange. The Corporation mainly renders wireless communication services.

The Corporation's services are under the type I license (nation-wide GSM 1800; "GSM" means "global system for mobile communications") issued by the Directorate General of Telecommunications (DGT) of the ROC. The license allows the Corporation to provide services for 15 years from 1997 onwards. It also entails the payment of an annual license fee consisting of 2% of total wireless communication service revenues. On March 24, 2005, the Corporation received the third generation (3G) concession operation license issued by the DGT. The 3G license allows the Corporation to provide services from the issuance date of the license to December 31, 2018.

As of December 31, 2007 and 2006, the Corporation and subsidiaries had 4,586 and 3,037 employees, respectively.

#### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

##### Basis of Presentation

The accompanying consolidated financial statements have been prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers, the Business Accounting Law, Guidelines Governing Business Accounting, and accounting principles generally accepted in the ROC. In conformity with these guidelines, the Law, and principles, the Corporation and subsidiaries (hereinafter referred to as the "Group") are required to make certain estimates and assumptions that could affect the amounts of allowance for doubtful accounts, provision for losses on decline in value of inventories, depreciation, pension, allowance for deferred income tax assets, impairment loss on assets, etc. Actual results may differ from these estimates.

For the convenience of readers, the accompanying financial statements have been translated into English from the original Chinese version prepared and used in the ROC. If there is any conflict between the English version and the original Chinese version or any difference in the interpretation of the two versions, the Chinese-language financial statements shall prevail.

##### Consolidation

###### a. Basis of consolidation

The consolidated financial statements have been prepared in accordance with the Statement of Financial Accounting Standards (SFAS) No. 7, "Consolidated Financial Statements," and included the financial statements of the Corporation, its direct and indirect subsidiaries with at least 50% shareholding and other investees controlled by the Corporation. As obtaining the majority of the shareholder's equity of the subsidiaries during the year, the company starts to consolidate the related revenues and expenses of the subsidiaries since the date of having the controlling interest.

For foreign subsidiaries using their local currency as their functional currency, assets and liabilities are translated at exchange rates in effect on the balance sheet date; shareholders' equity accounts are translated using historical exchange rates and income statement accounts are translated using average exchange rates during the period.

All significant intercompany balances and transactions have been eliminated upon consolidation.

- b. Under the above basis of consolidation, the consolidated entities were as follows:

Note 1: The former TFN merged into TFN on December 28, 2007, thus, the company became the subsidiary of TFN.

Note 2: FYM merged into TFNM on December 1, 2007, thus, the company became the subsidiary of TFNM.

To position as an integrated telecom and media player down the road differentiating from competition and build growth momentum exposure to higher margin lines of business, the Board of Directors of TIT resolved to acquire the former TFN through a public tender offer on March 1, 2007, and approved to buy shares continuously from minorities on April 26, 2007, both at the price of \$8.3 per share. The former TFN and its subsidiaries have become the subsidiaries of the Corporation since April 17, 2007. In addition, TIT's Board of Directors resolved on June 29, 2007 to fully merge the former TFN at \$8.3 per share, with TIT as the surviving company. TIT thus assumed all the rights and obligations of TFN and was renamed as TFN on the record date, December 28, 2007.

As of April 17, 2007, the Corporation owned 84.03% of the former TFN's shares through subsidiaries. The financial numbers of the former TFN and its subsidiaries from April 17 to December 31, 2007 have been included in the accompanying consolidated financial statements.

In September, 2007, the Corporation owned more than 50% of TTN's shares through subsidiaries. The financial numbers of TTN and its subsidiary from September to December, 2007 have been included in the accompanying consolidated financial statements.

The Group's main accounting policies are summarized as follows:

### **Classification of Current and Non-current Assets and Liabilities**

Current assets include cash and cash equivalents, assets held for trading and those expected to be converted to cash, sold or consumed within twelve months from the balance sheet date. Other assets such as property and equipment and intangible assets are classified as non-current. Current liabilities are obligations held for trading and those expected to be due within twelve months from the balance sheet date. All other liabilities are classified as non-current.

### **Cash Equivalents**

Government bonds and short-term bills acquired with repurchase rights and having maturities of up to three months from the date of purchase are classified as cash equivalents, whose carrying value approximates fair value.

### **Financial Instruments at Fair Value through Profit or Loss**

Financial instruments at fair value through profit or loss include financial assets or liabilities held for trading and those designated on initial recognition to be measured at fair value with fair value changes recognized in profit or loss. On initial recognition, the financial instruments are recognized at fair value plus transaction costs and are subsequently measured at fair value with fair value changes recognized in profit or loss. The purchase or sale of the financial instruments is recognized and derecognized using trade date accounting.

The fair value of open-end mutual funds is based on the net assets value on the balance sheets date.

### **Available-for-sale Financial Assets**

On initial recognition, available-for-sale financial assets are recognized at fair value plus transaction costs. When subsequently measured at fair value, the fair value changes are recognized directly in equity. The cumulative gain or loss that was recognized in equity is recognized in profit or loss when an available-for-sale financial asset is derecognized from the balance sheet. The purchase or sale of the financial instruments is recognized and derecognized using trade date accounting.

Cash dividends are recognized as dividend income on the ex-dividend date, but are accounted for as reductions to the original cost of investments if such dividends are declared on the earnings of investees attributable to periods prior to the purchase of investments. Stock dividends are not recognized as current income but are accounted for only as an increase in the number of shares held. The cost per share is re-calculated based on the new number of shares.

An impairment loss is recognized if there is objective evidence that a financial asset is impaired. If the amount of impairment loss decreases in the subsequent period, such decrease is recognized in equity.

The fair value of listed securities is based on the closing price on the balance sheet date. The fair values of open-end mutual funds are referred to financial assets at fair value through profit or loss.

### **Allowance for Doubtful Accounts**

Allowance for doubtful accounts is provided on the basis of past experiences and an evaluation of the aging and collectibility of all receivables on the balance sheet date.

### **Inventories**

Inventories are stated at the lower of weighted-average cost or market value. Market value are evaluated on the basis of replacement cost or net realizable value.

### **Investments Accounted for Using Equity Method**

Long-term investments in which the Corporation and subsidiaries own 20% or more of an investee's outstanding voting shares or exercise significant influence on an investee are accounted for by the equity method.

Effective January 1, 2006, in accordance with the newly revised Statement of Financial Accounting Standards (SFAS), the cost of acquisition is subjected to an initial analysis, and goodwill represents the excess of the cost of acquisition over the fair value of the identifiable net assets value. Goodwill is no longer amortized but instead tested annually for impairment. An impairment test is also required if there is evidence indicating that goodwill might be impaired as a result of specific events or changes in economic environment. If the fair value of identifiable net assets acquired exceeds the cost of investments, the difference should be allocated to reduce non-current assets proportionately to their respective fair values (except for financial assets not under the equity method, assets for disposal, deferred income tax assets and prepaid pension costs or other retirement benefit costs). If these assets are all reduced to zero, the remaining excess should be recognized as extraordinary gain. Starting from January 1, 2006, the unamortized balance of the excess of the acquisition cost of the long-term investment by the equity method over the equity in the investee's net assets value is also no longer amortized and applies the same accounting treatment as goodwill.

Gains or losses from the Corporation's sales to its subsidiaries are deferred and included in deferred income and recorded as other liabilities. Gains or losses on the sales to the Corporation by equity-method investees that are not majority owned are deferred in proportion to the Corporation's ownership percentages in the investees until these sales are realized through transactions with third parties. Gains or losses from transactions between two equity-method investees are deferred in proportion to the Corporation's equivalent stock ownership in the investees if the Corporation has controlling power over each investee.

If the investor does not have controlling power over the two equity-method investees that have transactions with each other, unrealized gains or losses on the transactions should be deferred in proportion to the percentage of ownership in one investee multiplied by the ownership percentage in the other investee.

The cost and the resulted gain or loss from sales of investments is determined by the weighted-average method.

## **Financial Assets Carried at Cost**

If there is no active market for an equity instrument and a reliable fair value can not be estimated, the equity instrument, including non-publicly traded and emerging stocks, etc, is measured at cost. The accounting for the dividends from financial assets carried at cost is the same as that for available-for-sale financial assets. Impairment losses are recognized if there is objective evidence of a decrease in fair value. Reversal of impairment losses is not allowed.

## **Bonds Measured at Amortized Cost**

Bond portfolios with fixed or determinable payments and with no quoted prices in an active market are carried at amortized cost using the effective interest method. These bond portfolios are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition or the issuance of the financial assets. Profit or loss is recognized at the time of de-recognition, impairment or amortization. A regular purchase or sale of financial assets is recognized and de-recognized using trade date accounting.

If there is objective evidence of impairment loss as of the balance sheet date, impairment loss should be recognized. If the impairment loss decreases and the decrease can be related objectively to an event occurring after impairment loss recognition, the impairment loss should be reversed. This reversal should not result in the carrying amount of the financial asset exceeding the amortized cost that would have been determined had no impairment loss been recognized.

## **Property and Equipment and Assets Leased to Others**

Property and equipment and assets leased to others are stated at cost less accumulated depreciation and accumulated impairment. Significant additions, renewals, betterments, and interest expenses incurred during the construction period are capitalized, while maintenance and repairs are expensed. Property and equipment covered by agreements qualifying as capital leases are carried at the lower of the present value of future minimum lease payments or the market value of the property on the starting dates of the leases.

Depreciation is calculated using the straight-line method over the estimated service lives, which range as follows: buildings - 40 to 55 years; telecommunication equipment - 2 to 15 years; office equipment - 3 to 8 years; leased assets - 20 years; leasehold improvements - 3 to 10 years; and miscellaneous equipment - 2 to 6 years.

Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to non-operating gain or loss in the period of disposal.

## **Intangible Assets**

### a. Franchise

Franchise refers to the payment for the 3G mobile telecommunication service - License C. The 3G concession is recorded at acquisition cost and is amortized over 13 years and 9 months starting from launch of 3G services.

### b. Computer software

Computer software cost is amortized by straight-line method over 2 to 12 years.

c. Goodwill

Goodwill is the unidentifiable difference between the cost of acquisition and the equity in the investee's net asset value. Starting January 1, 2006, in accordance with the newly revised SFAS, goodwill is no longer amortized. Please refer to the accounting policy of investments accounted for by the equity method.

d. Customer relationship and operating rights

The customer relationship and operating rights shall be identified when analyzing the excess of acquisition cost over the ownership in net assets value of an investee, and be booked at fair values provided by the purchase price allocation report.

Customer relationship and operating rights are measured on the basis of the future economic value and useful life of a subsidiaries' cable TV and data network businesses. Customer relationship is amortized by straight-line method over 6 to 20 years. Operating rights is based on a license issued by the Ministry of Transportation and Communications. Although the license has a statutory period, the subsidiary can file for license renewal. Although the license has a statutory period, it can be filed for renewal. Furthermore, it does not have a definite useful life in light of future competition from IPTV. Thus, this intangible asset should be tested annually for impairment instead of being amortized in accordance with SFAS No. 37. An impairment test is also required if there is evidence of goodwill impairment due to certain circumstances.

e. Other

Trademarks are amortized by the straight-line method over 5 to 10 years.

### **Idle Assets**

Property not currently used in operations are stated at the lower of book value or net realizable value, with the difference charged to current loss. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets.

### **Deferred Charges**

Deferred charges, which included interior decoration, arrangement fee from syndicated bank loan, and issuance costs of bonds are amortized by the straight-line method over 3 to 7 years or contract periods.

### **Asset Impairment**

If the carrying value of assets (including property and equipment, intangible assets, idle assets, assets leased to others and investments accounted for using equity method and deferred charges) is more than their recoverable amount, which indicates that an impairment exists, an impairment loss should be recognized. Any subsequent reversal of the impairment loss for the increase in recoverable amount is recognized as income. The reversal of impairment loss on goodwill is not allowed.

### **Pension Costs**

The pension costs under the defined benefit pension plan are recognized on the basis of actuarial calculations. The contribution amounts of the pension costs under the defined contribution pension plan are recognized as current expenses during the employees' service years.

## **Bonds Payable**

Convertible bonds with redemption rights are classified as current or non-current according to the redemption dates. The redemption price in excess of the face value of the bonds is amortized using the interest method from the issuance date through the maturity date and accounted for as accrued interest compensation. The accrued interest compensation is provided as a valuation account of convertible bonds. The issuance costs are recognized as deferred charges. The issuance costs for the non-convertible bonds are amortized over the term of the bond, and those for the convertible bonds with redemption rights are amortized from the issuance date to the maturity date of redemption rights.

When bondholders exercise their conversion rights, the face value of the bonds and the related accrued interest compensation are both transferred to capital stock or entitlement certificates and capital surplus.

## **Income Taxes**

The inter-period and intra-period allocation method is used for income taxes. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits and net operating loss carryforwards. Valuation allowance is provided for deferred income tax assets to the extent that more likely than not such assets will not be realized. Deferred tax assets or liabilities are classified as current or non-current according to the classification of related assets or liabilities for financial reporting. However, if deferred tax assets or liabilities do not relate to assets or liabilities in the financial statements, they are classified as current or non-current on the basis of the expected length of time before realized.

Tax credits for certain purchases of equipment and technology, research and development expenditures and personnel training are recognized by the current method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax expense.

Income tax of 10% on unappropriated earnings generated is expensed in the year when the shareholders resolve the retention of the earnings.

Income Basic Tax Act has taken effect from January 1, 2006. The amount of basic income shall be the sum of the taxable income as calculated in accordance with the Income Tax Act, plus deductions claimed in regard to investment tax credit granted under the provisions of other laws. The amount of basic tax shall be the amount of basic income multiplied by the tax rate (10%). Between the basic tax under the Income Basic Tax Act and the regular income tax calculated based on the Income Tax Act, the Corporation should pay whichever is the higher amount for the current income tax.

## **Treasury Stock**

The purchase of issued shares is accounted for by debiting treasury stock, which is a reduction of shareholders' equity. The Corporation's shares held by its subsidiaries are treated as treasury stock and reclassified from investments accounted for using equity method to treasury stock.

If the proceeds on the disposal of treasury stock exceed the carrying value of treasury stock, the excess is credited to capital surplus from treasury stock. If the proceeds are less than the carrying value of treasury stock, the difference is debited to capital surplus from treasury stock. If the balance of capital surplus from treasury stock is not sufficient to absorb the difference, the rest is recorded as a reduction of retained earnings.

## **Foreign-currency Transactions**

Assets, liabilities, revenues or expenses denominated in foreign currencies as a result of foreign-currency transactions of non-derivative financial instruments are recorded in New Taiwan dollars at the exchange rates prevailing on the dates of transactions.

Monetary assets or liabilities denominated in foreign currencies are translated at the exchange rates prevailing on the balance sheet date, and the resulting exchange differences are included in profit or loss for the current year.

Non-monetary assets or liabilities carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the balance sheet date when the fair value was determined, and the resulting exchange differences are included in profit or loss for the current period except for the differences arising on the retranslation of non-monetary assets and liabilities in respect of which gains and losses are recognized directly in equity. For such non-monetary assets and liabilities, any exchange component of that gain or loss is also recognized directly in equity. Non-monetary assets or liabilities carried at cost that are denominated in foreign currencies are translated at the historical rates prevailing on the dates of transactions.

The above prevailing exchange rates are based on the average of bid and ask rates of principal banks.

### **Revenue Recognition**

Revenues are recognized when the service rendering process is completed or virtually completed, and earnings are realizable and measurable. Related costs of providing services are concurrently recognized as incurred.

Service revenues from wireless services, value-added services, and fixed network services, net of any applicable discount, are billed at predetermined rates; the fixed-monthly fees on basic cable TV services are accrued; prepaid card service are recognized on the basis of minutes of usage.

### **Promotion Expenses**

Commissions and cellular phone subsidy costs pertaining to the Corporation's promotions are recognized as marketing expenses on an accrual basis in the current period.

### **Hedging Derivative Financial Instruments**

The interest rate swap contracts which the Corporation entered into to manage its exposure to the interest rate risk are designated as a cash flow hedge. The hedging instrument is measured at fair value, and the change of fair value is recognized directly in equity and will be recognized as profit or loss when the hedged forecast transaction affects profit or loss. If the cumulative net loss recognized in equity is regarded as irrecoverable, it is immediately recognized as a loss in the current period.

### **Reclassification**

Certain accounts in the financial statements as of and for the year ended December 31, 2006 have been reclassified to conform to the presentation of financial statements as of and for the year ended December 31, 2007.

## **3. REASONS AND EFFECT OF CHANGES IN ACCOUNTING PRINCIPLES**

Effective January 1, 2006, the Group adopted newly issued SFAS No. 34, "Accounting for Financial Instruments," SFAS No. 36, "Disclosure and Presentation of Financial Instruments," and the revisions on the related SFASs.

Upon adoption of the newly issued and revised SFASs, the Group appropriately reclassified the financial assets and liabilities, including derivatives. The adjustments to the carrying values of the financial instruments at fair value through profit or loss were recorded in the cumulative effect of changes in accounting principles, and those of the available-for-sale financial assets measured at fair value and of the derivatives for cash flow hedge were recorded in equity.

The effect of the first time adoption of these SFASs is summarized as follows:

	Recognized as Cumulative Effect of Changes in Accounting Principles (Net of Tax)	Recognized in Equity (Net of Tax)
Financial assets at fair value through profit or loss	\$ 35	\$ -
Available-for-sale financial assets	-	2,082,823
Hedging derivative financial liabilities	<u>-</u>	<u>(248,184)</u>
	<u>\$ 35</u>	<u>\$ 1,834,639</u>

The changes in accounting policy resulted in a decrease in income after income tax of \$35 thousand for the year ended December 31, 2006, but had no effect on net income and earnings per share (net of tax).

Starting on January 1, 2006, the Group adopted newly revised SFAS No. 1, "Conceptual Framework for Financial Accounting and Preparation of Financial Statements," SFAS No. 5, "Long-term Investments in Equity Securities," and SFAS No. 25, "Business Combinations - Accounting Treatment under Purchase Method." These revisions primarily included that goodwill is no longer amortized and that the difference between the cost of acquisition and the equity in the investee's net assets value is subjected to an initial analysis. If defined as goodwill, the difference is no longer amortized but instead tested annually for impairment. These adoptions increased the income after income tax by \$486,667 thousand and had no effect on the cumulative effect of changes in accounting principle for the year ended December 31, 2006.

For the third quarter of 2006, the Corporation entered into an accounts receivable factoring contract with HC Asset Management Co., Ltd. The Corporation sold \$5,743,279 thousand of the overdue accounts receivable, which had been written off, to HC Asset Management Co., Ltd. The aggregate selling price was \$229,731 thousand. Under this contract, the Corporation would no longer assume the risk on this receivable.

## 8. INVESTMENTS ACCOUNTED FOR USING EQUITY METHOD

The subsidiary of the Corporation, TUC, acquired more than 50% of TTN's shares in September 2007 and thus had control over TTN. The Corporation recognized investment income of \$487 thousand from August 15 (acquisition date) to August 31, on its investment in TTN.

The subsidiary of the Corporation, TFN, acquired more than 50% of the former TFN's shares on April 17, 2007 and thus had control over the former TFN. The Corporation recognized investment income of \$172,290 thousand from January 1 to April 16, on its investment in the former TFN and TFN's subsidiaries.

The investment income in Howin Technologies Co., Ltd. (HTC) was recognized under the equity method by debiting long-term investments. In the year ended December 31, 2006, HTC was divested. The investment income on HTC for the year ended December 31, 2006, determined on the basis of this investee's unaudited financial statements, was \$554,770 thousand, and it included deferred gains or losses on the Corporation's equity accounted investee's sales to the Corporation and reciprocal transactions, amounting to \$552,725 thousand when the Corporation and its subsidiaries sold HTC.

Ending balance	<u>\$ 9,231,478</u>	<u>\$ 2,861,323</u>	<u>\$ 1,382,000</u>

a. Customer relationship and operating rights

Under SFAS No. 25 - "Business Combinations" and No. 37 - "Accounting for Intangible Assets", the Corporation should measure the fair value of the acquired assets and identify major intangible assets as well as the amortization periods.

- 1) On April 17, 2007, TFN, the Corporation's 100%-owned subsidiary, acquired more than 50% of the former TFN through a public tender offer at the price of NT\$8.3 per share. The Corporation divided the former TFN and its subsidiaries into two cash-generating units, fixed network service and cable TV. Accordingly, customer relationship and operating rights are identified as major intangible assets.
- 2) On September, 2007, TUC, the Corporation's 100%-owned subsidiary, acquired more than 50% of TTN's shares at NT\$13.843 per share. The Corporation measured the fair value of the acquired assets, and viewed TTN's ISP services as one cash-generating unit. Accordingly, customer relationship is identified as major intangible asset.

b. Goodwill

In conformity with SFAS No. 35, "Accounting for Asset Impairment," the Group identified the smallest identifiable group of cash-generating units by years and entities as follows:

In 2006, the Group was engaged in mobile service only and identified the Corporation, TAT and Mobitai as independent cash-generating units.

In 2007, to be in line with the Group's integration of business resources and customer services for better core competence, the Corporation, TAT and Mobitai were viewed as one cash-generating unit. Besides, impairment test on goodwill of newly consolidated cable subsidiaries was needed. The critical assumptions to evaluate the recoverable amounts of operating assets and goodwill by business were as follows:

1) Wireless service

a) Assumptions on operating revenues

After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers, minutes of incoming and outgoing calls and average revenue per minute.

b) Assumptions on operating costs and expenses

The estimates of commissions, customer retention costs, customer service costs and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2007 and 2006 financial statements.

c) Assumptions on discount rate

In 2007, the Group used the discount rate of 6.78% in calculating the consolidated asset recoverable amounts of the Corporation, TAT and the Mobitai, respectively. In 2006, the discount rates are 8.70%, 9.84%, and 9.70% in calculating the asset recoverable amounts of the Corporation, TAT and the Mobitai, respectively.

2) Cable television business

a) Assumptions on operating revenues

After taking changes in the cable television industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers and average revenue per subscriber.

b) Assumptions on operating costs and expenses

The estimates of commissions, customer retention costs, customer service costs and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues in the 2007 and 2006 financial statements.

c) Assumptions on discount rate

The discount rate used to calculate the asset recoverable amounts was ranging 3.86% to 4.64%.

Based on the key assumptions of each cash-generating unit, the Group's management believes that the carrying amounts of these assets for operating and goodwill will not exceed their recoverable amounts even if there are changes in the critical assumptions used to estimate recoverable amounts as long as these changes are reasonable for the years ended December 31, 2007 and 2006.

### **13. ASSETS LEASED TO OTHERS AND IDLE ASSETS**

	<b>December 31</b>	
	<b>2007</b>	<b>2006</b>
Assets leased to others		
Cost	\$ 580,268	\$ 776,379
Less: Accumulated depreciation	(22,382)	(43,747)
Less: Accumulated impairment	<u>(10,591)</u>	<u>(10,591)</u>
	<u>\$ 547,295</u>	<u>\$ 722,041</u>
Idle assets

Less: Accumulated impairment	<u>(101,705)</u>	<u>(725,353)</u>
	<u>\$ 315,583</u>	<u>\$ 227,921</u>

The carrying values of idle property (including land, buildings and telecommunication equipment) were less than their net realizable values or appraisal values, thus, the difference was recognized as impairment loss. The Corporation recognized an impairment loss of \$2,005 thousand in 2006.

a. Domestic secured bonds

On February 1, 2001, the Corporation issued \$3,000,000 thousand of five-year domestic secured bonds, with each bond having a face value of \$1,000 thousand with a coupon rate of 5.31% per annum. The bonds will be redeemed in the fourth and fifth years after the issuance date at \$1,500,000 thousand for each of those years. Interest is payable annually. The bonds were repaid by the Corporation in February 2006.

b. Domestic unsecured bonds

On December 13, 2002, the Corporation issued \$15,000,000 thousand of domestic unsecured bonds, with each bond having a face value of \$5,000 thousand. The bonds have four different types based on terms and dates. Types I and II both consist of A to L tranches. Types III and IV both consist of A to M tranches. Types I and II are five-year bonds and Types III and IV are seven-year bonds. The interest rates and payment terms are as follows:

	<b>Principal</b>	<b>Rate</b>	<b>Terms</b>
Type I	\$ 2,500,000	2.60%	Repayment of \$1,250,000 thousand each in the fourth and fifth years, interest payable annually
Type II	2,500,000	5.21%-6M LIBOR	Repayment on maturity date, interest payable semiannually
Type III	5,000,000	2.80%	Repayment of \$2,500,000 thousand each in the sixth and seventh years, interest payable annually
Type IV	5,000,000	5.75%-6M LIBOR	Repayment on maturity date, interest payable semiannually

	<u>\$ 15,000,000</u>		

Future repayments of corporate bonds are as follows:

<b>Year</b>	<b>Amount</b>
2008	\$ 2,500,000
2009	<u>7,500,000</u>
	<u><u>\$ 10,000,000</u></u>

c. 1st domestic convertible bonds

On August 25, 2001, the Corporation issued \$10,000,000 thousand of five-year domestic unsecured convertible bonds, with each bond having a face value of \$100 thousand and 0% interest. Within the conversion period, starting from 3 months after the issuance date to the 10th day before maturity, the bondholders may ask for bond conversion into common stocks or entitlement certificates of the Corporation. Cash is paid for those bonds that cannot be converted into one share. The conversion price is subject to adjustment based on the prescribed formula. The conversion price has been NT\$22.2 per share since July 20, 2006. As of August 24, 2006, bonds amounting to \$6,802,300 thousand had been converted to 226,716 thousand of common shares. As of August 24 (due date), 2006, bonds amounting to \$3,194,400 thousand were purchased and canceled by the Corporation, and the other \$3,300 thousand was repaid by the Corporation on August 24, 2006.

If the closing price of the Corporation's share is above 50% of the conversion price for 30 consecutive trading days of the Taiwan Stock Exchange from 3 months after bond issuance to the 40th day before maturity, the Corporation has the option to convert the bonds to entitlement certificates at the conversion price or to redeem the bonds by cash at face value. If the total value of outstanding convertible bonds becomes less than 10% of the total principal, the Corporation also has the option, at any time, to convert the bonds to entitlement certificates at the conversion price or to redeem the bonds by cash at face value.

On the third year after the issuance date, the holders may redeem the bonds by cash at face value plus interest accrued, which is 113.30% of face value calculated based on an implied yield rate of 4.25%. Upon maturity, the Corporation has redeemed the bonds by cash at face value plus interest accrued, which is 124.62% of face value, calculated based on an implied yield rate of 4.5%.

d. 2nd domestic convertible bonds

On August 16, 2002, the Corporation issued \$6,000,000 thousand of five-year domestic unsecured convertible bonds, with each bond having a face value of \$100 thousand and 0% interest. Within the conversion period from 3 months after issuance date to the 10th day before maturity, the bondholders may have the bonds converted into common stocks of the Corporation. Cash is paid for bonds that cannot be converted into one share. The conversion price is subject to adjustment based on the prescribed formula. The conversion price has been NT\$22.1 per share since July 24, 2007. As of August 15, 2007, bonds amounting to \$5,436,400 thousand had been converted to 210,871 thousand of common shares. Bonds amounting to \$544,700 thousand were purchased and canceled by the Corporation and \$18,900 thousand, the amount of the remaining bonds, was repaid by the Corporation on August 15, 2007.

If the closing price of the Corporation's share is above 50% of the conversion price for 30 consecutive trading days of the Taiwan Stock Exchange from 3 months after bond issuance to the 40th day before maturity, the Corporation has the option to convert the bonds to common stocks at conversion price or to redeem the bonds by cash at face value. If the total value of outstanding convertible bonds becomes less than 10% of the total principal, the Corporation also has the option - from 3 months after bond issuance to the 40th day before maturity - to convert the bonds to common stocks at the conversion price or to redeem the bonds by cash at face value.

On the third year after the issuance date, the holders may redeem the bonds by cash at face value plus interest accrued, which is 109.59% of face value, calculated based on an implied yield rate of 3.1%. Upon maturity, the Corporation has redeemed the bonds by cash at face value plus interest accrued, which is 117.63% of face value, calculated based on implied yield rate of 3.3%.

TFNI has \$2,450,000 thousand notes payable to Pacific Construction Co., Ltd. for the purchase of FYM in May 2006. The issuing period is 20 months starting from the transaction date. The present value of this payable is \$2,263,875 thousand, based on 4.75% discount rate.

## 19. PENSION PLAN

The Labor Pension Act (LPA) became effective on July 1, 2005. Employees on board before June 30, 2005 may choose to continue to be subject to the pension plan under the Labor Standards Act (LSA) or be subject to the new pension plan under LPA, with their service years accumulated as of July 1, 2005 to be retained and subject to the pension plan under LSA. Starting from July 1, 2005, new employees may only choose to be subject to the new pension plan under LPA.

The new LPA provides for a defined contribution pension plan. Starting from July 1, 2005, the Corporation should contribute monthly an amount equal to 6% of the employees' monthly wages to the employees' individual pension accounts. The contributed amount was \$156,225 thousand and \$108,036 thousand for the years ended December 31, 2007 and 2006, respectively.

The LSA provides for a defined benefit pension plan. Benefits are based on the length of service and average basic pay of the six months before retirement. The Corporation contributes monthly an amount equal to 2% of the employees' monthly wages to a pension fund. The pension fund is managed by an independently administered pension fund committee and deposited in the committee's name in the Bank of Taiwan (formerly the Central Trust of China, which was merged into the Bank of Taiwan in July 2007.) (Approved by Department of Labor, Taipei City Government on April 13, 2007, the Corporation suspended contributing from February 2007 to January 2008.)

Information on the defined benefit pension plan is summarized as follows:

## 20. SHAREHOLDERS' EQUITY

a. Capital surplus

Under the Company Act, capital surplus may only be used to offset a deficit. However, capital surplus generated from the excess of the issue price over the par value of capital stock, including the stock issued for new capital and the buyback of treasury stock, may be transferred to capital as stock dividends, and this transfer is restricted to a certain percentage of the capital surplus and may be made only within prescribed limits each time.

Capital surplus as of December 31, 2007 and 2006 were as follows:

	<b>December 31</b>	
	<b>2007</b>	<b>2006</b>
Premium of convertible bonds	\$ 8,775,819	\$ 8,748,571
Surplus from treasury stock transactions	8,027	-
Arising from long-term investments	<u>1,313</u>	<u>-</u>
	<b><u>\$ 8,785,159</u></b>	<b><u>\$ 8,748,571</u></b>

b. Appropriation of earnings and dividend policy

The Corporation's Articles of Incorporation provide that a 10% legal reserve should be set aside from the annual net income after the reduction of accumulated deficit. The remainder, less special reserve based on relevant laws or regulations or business requirements, should be distributed as follows:

- 1) Dividends and bonus to preferred shareholders.
- 2) Remuneration to directors and supervisors - up to 0.3%.
- 3) Bonus to employees - 1%-3%.
- 4) Remainder, to be appropriated as dividends as determined in the shareholders' meeting.

The Corporation's dividend distribution is based on the availability of excess funds. That is, the Corporation first projects future capital needs through a capital budgeting process and then provides for the projected capital needs by using retained earnings. Any remainder is available for dividend distribution. However, the amount of stock dividends should not be more than 80% of the total dividends to be distributed in a single year. The final amount, type and percentage of the dividends are subject to the approval by the Board of Directors and shareholders based on actual earnings and capital requirements of the Corporation in a particular year.

A regulation issued by the Securities and Futures Bureau requires a special reserve be made from the unappropriated earnings, equivalent to the debit balance of any account shown in shareholders' equity. The special reserve appropriated will be reversed to the extent that the net debit balance reverses.

The appropriation of earnings should be resolved by the shareholders in the following year and given effect to in the financial statements of that year.

Under the Integrated Income Tax System, ROC resident shareholders are allowed a tax credit for the income tax paid by the Corporation. An imputation credit account (ICA) is maintained by the Corporation for such income tax and the tax credit allocated to each shareholder.

The 2006 and 2005 earnings appropriations resolved by the shareholders in their meetings on June 15, 2007 and 2006 were as follows:

	<u>Appropriation of Earnings</u>		<u>Dividend Per Share (NT\$)</u>	
	<u>For Fiscal Year 2006</u>	<u>For Fiscal Year 2005</u>	<u>For Fiscal Year 2006</u>	<u>For Fiscal Year 2005</u>
Appropriation of legal reserve	\$ 1,617,074	\$ 1,623,670		
Appropriation of special reserve	143,563	1,150,000		
Reversal of special reserve	-	(1,631 )		
Remuneration to directors and supervisors	43,231	40,394		
Cash bonus to employees	432,303	403,940		
Cash dividends	<u>12,880,151</u>	<u>12,843,997</u>	\$2.58757	\$2.61677
	<u>\$ 15,116,322</u>	<u>\$ 16,060,370</u>		

Had the above bonus to employees and remuneration to directors and supervisors been charged against income in 2007 and 2006, the basic earnings per share in that year would have decreased from \$3.28 to \$3.18 and from \$3.31 to \$3.22, respectively.

The appropriation of the Corporation's 2007 earnings had not been proposed by the Board of Directors as of January 11, 2008, the date of the accompanying independent auditors' report. Information on the appropriation of 2007 earnings proposed by the Board of Directors and resolved by the shareholders can be accessed through the Market Observation Post System on the Taiwan Stock Exchange Corporation's website.

c. Cash reduction

To increase ROE (Return of Equity) and maintain stable EPS (Earnings Per Share) and dividend, the Corporation's AGM (Annual General Shareholders' Meeting) resolved on June 15, 2007, a capital reduction of \$12,000,000 thousand, representing 24% of outstanding shares. The authority approved the Corporation's capital reduction on October 17, 2007. The Corporation's Board of Directors set the record date on December 1, 2007 to return \$12,000,000 thousand to investors, credited to the account of "other payables".

Note: Shares held before capital reduction.

## 1) Transfer of stock to employees

For the year ended December 31, 2007, the Corporation transferred the bought-back treasury stocks through various tranches to employees of 46,537 thousand shares at \$28.17, \$31.16 and \$31.15 per share, respectively, resulting in a reduction of retained earnings, amounting to \$4,869 thousand and an increase on paid-in capital, amounting to \$8,027 thousand.

For the year ended December 31, 2006, the Corporation transferred the treasury stock through various tranches to employees of 22,818 thousand shares at \$30.47 and \$28.17 per share, resulting in a reduction of retained earnings, amounting to \$57,372 thousand.

Under the Securities and Exchange Law, the buyback amount of treasury stock should not exceed 10% of total issued shares, and the buyback cost should not exceed the sum of the retained earnings, additional paid-in capital in excess of par value and realized capital surplus. In addition, the Corporation should not provide treasury stock as collateral and should not exercise shareholders' rights on those shares before transfer.

## 2) Shares held by subsidiaries

On December 31, 2007, TFN and TFNI, its subsidiary, held the carrying and market value of the treasury stocks, amounting to \$56,235,084 thousand. The Corporation reclassified \$40,844,007 thousand from investments accounted for using equity method to treasury stock based on SFAS No. 30, "Treasury Stock". Although these shares are treated as treasury stock in the consolidated financial statement, the shareholders are entitled to excise their rights on these shares, except for participation in capital injection by cash. In addition, based on the ROC Company Act, the shareholders of treasury stocks can not exercise the voting right.

e. Unrealized losses on financial instruments

Unrealized gains or losses on financial instruments for the years ended December 31, 2007 and 2006 were summarized as follows:

### 24. FINANCIAL INSTRUMENT TRANSACTIONS

a. Fair value information

	December 31			
	2007		2006	
	Carrying Value	Fair Value	Carrying Value	Fair Value
<u>Non-derivative financial instruments</u>				

Liabilities

Bonds payable (including current portion) \$ 10,000,000 \$ 9,942,440 \$ 13,814,448 \$ 13,741,839

b. The methods and significant assumptions applied in determining fair values of financial instruments were as follows:

- 1) Financial assets at fair value through profit or loss and available-for-sale financial assets - based on quoted prices in an active market on the balance sheet date.
- 2) Because there is no active market and a reliable fair value could only be verified at a more than reasonable cost, the fair values of investments in unlisted stocks carried at cost or accounted for using equity method can be measured by net worth of investee or estimate of the book value.
- 3) The fair value of long-term liabilities is measured at the present value of expected cash flows. Fair value approximates book value
- 4) Bonds payable - based on the over-the-counter quotations in December.
- 5) Derivative financial instruments - based on valuation results provided by banks. As of December 31, the financial instrument held by the Corporation turned into financial liability, evaluated by the bid price of counter party.
- 6) The above financial instruments do not include cash and cash equivalents, notes and accounts receivables, pledged time deposits, refundable deposits, short-term bank loans, short-term notes and bills payable, notes and accounts payable and guarantee deposits. Because of the short maturities of these instruments, the carrying values represent a reasonable basis to estimate fair values.

- c. The fair values of financial assets and liabilities were not simultaneously determined by quoted prices in active markets and by estimations using valuation technique.
- d. The financial assets exposed to fair value interest rate risk amounted to \$5,731,890 thousand and \$11,168,906 thousand as of December 31, 2007 and 2006, respectively, and the financial liabilities exposed to fair value interest rate risk amounted to \$28,375,093 thousand and \$6,314,448 thousand as of December 31, 2007 and 2006, respectively. The financial assets exposed to cash flow interest rate risk amounted to \$1,295,434 thousand and \$1,195,118 thousand as of December 31, 2007 and 2006, respectively, and the financial liabilities exposed to cash flow interest rate risk amounted to \$5,051,665 thousand and \$7,791,046 thousand as of December 31, 2007 and 2006, respectively.

- e. Information on financial risks:

- 1) Market risk

The interest rate swap (IRS) contracts are used to hedge interest rate fluctuation on its liabilities with anti-floating interest rates. Since the interest receivable and payable are settled at net amounts on the settlement date. The market risk is immaterial.

- 2) Credit risk

Credit risk represents the potential impacts to financial assets that the Corporation might encounter if counter-parties or third parties breach the contracts. Factors that affect the impacts include credit risk concentration, components of financial instruments, contract amount and other receivables. The Corporation's evaluation of credit risk exposure as of December 31, 2007 and 2006 were both zero because all of counter-parties are reputable financial institutions with good credit ratings.

The Group's maximum credit risk exposure of each financial instrument is the same as its carrying value.

The credit risk amount listed above is an evaluation over the contracts with positive fair value at the balance sheet date and the contracts of off-balance-sheet commitments and guarantees. Significant concentration of credit risk exists when counter-parties in financial instrument transactions significantly concentrate on one individual, or when there are a number of counter-parties in financial instrument transactions, but these counter-parties are engaged in similar business activities and have similar economic characteristics so that their abilities to perform contractual obligations would be concurrently affected in similar economic changes or other situations. The characteristics of credit risk concentration include the nature of the debtors' operating activities. The Group does not rely significantly on single transaction and transact with single client or in the same region.

- 3) Liquidity risk

The Group entered into IRS transactions to hedge cash flow risks. Because the IRS contracts are settled at net amounts, the expected cash demand is insignificant. The Group have sufficient working capital to meet cash demand.

- 4) Cash flow risk from interest rate fluctuations: None

- f. The purpose of derivative financial instruments held or issued and the strategies to meet the purpose

The Group uses IRS contracts to hedge fluctuation on its liabilities with anti-floating interest rates. The overall purpose of these contracts is to hedge the Group's exposure to cash flow risks. The Group uses interest rate swaps to hedge interest rate fluctuation risk and periodically evaluates the effectiveness of the hedging instruments.

Note 1: For the entities which have short-term financing needs (loaning entities), the aggregate amount of loaning fund shall not exceed 40 percent of the financing company's net worth. The individual loaning fund shall be limited to the lowest amount of the following items: 1) 40 percent of the financing company's net worth; 2) the amount that the financing company invests in the loaning entities; or 3) the amount = (the share portion of the loaning entities that the financing company invests)\* (the total loaning amounts of the loaning entities). In the event that a financing company directly or indirectly 100% owns a counter-party, the individual lending amount and the aggregate amount of loaning funds shall not exceed 40% of the financing company's net worth.

Note 2: (a) The amount of financing provided, including transactions, business cooperation and short-term financing, should not exceed the higher amount between the net worth of the corporation or the amount of transactions plus business cooperation. (b) The limited amount of financing provided for short-term financing should not exceed 40% of the net worth of the counter-party.

Note 3 Where funds are loaned for reasons of business dealings, the individual lending amount and the aggregate amount of loaning funds shall be both limited to the higher amount of the following items: 1) a multiple of the financing company's capital, or 2) the amount of business dealing.

Note 4: Assumed all MBT's financing provided to others due to merger.
