Explanations of significant changes in the Company's condensed balance sheets for the past five years are as follows:

1. Current assets

In 2009, the Company upstreamed cash from its subsidiary Taiwan Cellular Co., Ltd. (TCC), resulting in an increase in current assets. In 2010, current assets were higher because of an increase in inventory for handset promotional campaigns and a rise in receivables from subsidiaries, who borrowed funds through the parent company due to the parent company having access to lower borrowing rates with the banks. In 2011, the Company had a capital reduction and acquired a 51% stake in Fubon Multimedia Technology (momo), leading to a decrease in current assets.

2. Funds and long-term investments

TCC, the Company's 100%-owned subsidiary, had a capital reduction in 2009, resulting in a decrease in long-term investments. In 2011, the Company acquired a 51% stake in momo, resulting in an increase in long-term investments.

3. Fixed assets

The depreciation and retirement of obsolete 2G equipment resulted in a decline in fixed assets.

4. Intangible assets

In 2008, intangible assets increased as the Company merged with TAT International and inherited the goodwill.

5. Other assets

The 2009 amendment of Article 5 of the Income Tax Act lowered the corporate statutory tax rate from 25% to 20% effective 2010; as such, deferred income tax assets were revised downward accordingly. On June 15, 2010, further amendment of Article 5 of the Income Tax Act reduced the corporate statutory income tax rate from 20% to 17%, leading to a downward revision of deferred tax assets.

6. Current liabilities

Current liabilities decreased due to bank loan repayment and settlement of capital reduction in 2008. The repayment of corporate bond-current portion resulted in a decrease in current liabilities in 2009. In 2010, current liabilities increased due to higher short-term borrowings and advance receipts. As the corporate bond due within one year was reclassified as corporate bond-current portion, current liabilities increased in 2011.

7. Long-term liabilities

In 2008, a second unsecured corporate bond issue and an increase in syndicated loans led to higher long-term liabilities. In 2009, long-term liabilities decreased, as the Company repaid its syndicated loans. As the corporate bond due within one year was reclassified as corporate bond-current portion, long-term liabilities decreased in 2011.

8. Shareholders' equity

In 2008, the sale of 300mn Company shares by its subsidiary led to a decrease in the number of treasury shares, while disposal gains led to an increase in capital surplus and, thus, shareholders' equity. Paid-in capital dropped because of capital reduction in 2011.

Explanations of significant changes in the Company's condensed income statements for the past five years are as follows:

1. Operating income

Increased sales of and subsidies for smart devices to promote data services resulted in higher operating costs and lower operating income in 2010 and 2011.

2. Non-operating income

In 2009, non-operating income decreased due to lower investment income from TAT, which was merged into the Company in Sept. 2008. In 2010, non-operating income increased due to higher investment income resulting from growth in TFN Media Co., Ltd's Pay TV and broadband internet access services.

3. Non-operating expense

Significant losses from the asset write-off of obsolete telecom equipment following technology upgrade and network integration were recognized in 2007. The repayment of corporate bonds at the end of 2009 resulted in lower interest expense in 2010. Lower non-operating expenses in 2011 were due to fewer asset write-offs and losses from the disposal of fixed assets.

Explanations of significant changes (>20%) in 2011 compared with the previous year:

- (1) The Company had a capital reduction and acquired a 51% stake in Fubon Multimedia Technology (momo) using money collected from receivables owed by subsidiaries, resulting in a decrease in current assets and lower current ratio and quick ratios. The repayment of a syndicated loan in March 2011 led to lower interest expenses, which in turn raised the interest coverage ratio.
- (2) Benefiting from the capital reduction, average shareholders' equity and paid-in capital dropped, resulting in increases in return on equity, pre-tax income as a percentage of paid-in capital and EPS.
- (3) As the corporate bond due within one year was reclassified as corporate bond-current portion, current liabilities increased in 2011, leading to a decline in the cash flow ratio.

Note: 2007-2011 financial data have been duly audited by independent auditors.
