Independent Accountants' Review Report

#### INDEPENDENT ACCOUNTANTS' REVIEW REPORT

The Board of Directors and Shareholders Taiwan Mobile Co., Ltd.

We have reviewed the accompanying consolidated balance sheets of Taiwan Mobile Co., Ltd. (the "Corporation") and subsidiaries as of June 30, 2011 and 2010, and the related consolidated statements of income, changes in shareholders' equity and cash flows for the six months then ended. These consolidated financial statements are the responsibility of the Corporation's management. Our responsibility is to issue a report based on our review.

We conducted our review in accordance with Statement of Auditing Standards No. 36 - "Engagements to Review Financial Statements" of the Republic of China. A review consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the Republic of China, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the consolidated financial statements referred to above for them to be in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the Republic of China.

KPMG Taipei, Taiwan (the Republic of China) July 15, 2011

#### Notice to Readers

The accompanying consolidated financial statements are intended only to present the financial position, results of operations, and cash flows in accordance with accounting principles and practices generally accepted in the Republic of China and not those of any other jurisdictions. The standards, procedures and practices to review such consolidated financial statements are those generally accepted and applied in the Republic of China.

### TAIWAN MOBILE CO., LTD. AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS FOR THE SIX MONTHS ENDED JUNE 30, 2011 AND 2010 (In Thousands of New Taiwan Dollars, Unless Stated Otherwise) (Reviewed, Not Audited)

#### 1. ORGANIZATION AND OPERATIONS

Taiwan Mobile Co., Ltd. was incorporated in the Republic of China (ROC) on February 25, 1997. The Corporation's shares began to be traded on the ROC Over-the-Counter Securities Exchange (known as GreTai Securities Market) on September 19, 2000. On August 26, 2002, the Corporation's shares were listed on the Taiwan Stock Exchange. The Corporation mainly renders wireless communication services.

The Corporation's services are under the type I license issued by the Directorate General of Telecommunications (DGT) of the ROC. The license allows the Corporation to provide services for 15 years from 1997 onwards. The license had been extended to June 2017 by the notice issued by the Ministry of Transportation and Communications on November 25, 2010. It also entails the payment of an annual license fee consisting of 2% of total wireless communication service revenues. On March 24, 2005, the Corporation received the third generation (3G) concession operation license issued by the DGT. The 3G license allows the Corporation to provide services from the issuance date of the license to December 31, 2018.

As of June 30, 2011 and 2010, the Corporation and subsidiaries (hereinafter referred to as the "Group") had 4,404 and 4,312 employees, respectively.

### 2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### **Basis of Presentation**

The accompanying consolidated financial statements have been prepared in conformity with the Guidelines Governing the Preparation of Financial Reports by Securities Issuers and accounting principles generally accepted in the ROC. In conformity with the above, the Group is required to make certain estimates and assumptions that could affect the amounts of allowance for doubtful accounts, provision for losses on decline in value of inventories, depreciation, pension, allowance for deferred income tax assets, bonus to employees, remuneration to directors and supervisors, impairment loss on assets, etc. Actual results may differ from these estimates.

The consolidated financial statements are the English translation of the Chinese version prepared and used in the Republic of China. If there is any conflict between, or any difference in the interpretation of, the English and Chinese language financial statements, the Chinese version shall prevail.

#### Consolidation

#### a. Basis of consolidation

The consolidated financial statements have been prepared in accordance with Statement of Financial Accounting Standards (SFAS) No. 7, "Consolidated Financial Statements," and include the financial statements of the Corporation, its direct and indirect subsidiaries with at least 50% shareholding, and other investees controlled by the Corporation. If the Corporation obtains the majority of the shareholders' equity of a subsidiary during the year, the Corporation starts to consolidate the related revenues and expenses of the subsidiary from the date of obtaining the controlling interest.

For foreign subsidiaries using their local currency as their functional currency, assets and liabilities are translated at exchange rates in effect on the balance sheet date; shareholders' equity accounts are translated using historical exchange rates, and income statement accounts are translated using average exchange rates during the period.

All significant intercompany balances and transactions have been eliminated upon consolidation.

b. Under the above basis of consolidation, the consolidated entities were as follows:

Note: Became a subsidiary of TCC, which purchased 100% of the shares of TT&T from TFN on May 14, 2010.

The Group's significant accounting policies are summarized as follows:

### Classification of Current and Non-current Assets and Liabilities

Current assets include cash and cash equivalents, assets held for trading, and those expected to be converted to cash, sold or consumed within twelve months from the balance sheet date. Other assets such as property and equipment and intangible assets are classified as non-current. Current liabilities are obligations held for trading and those expected to be due within twelve months from the balance sheet date. All other liabilities are classified as non-current.

### **Cash Equivalents**

Government bonds and short-term bills acquired with repurchase rights and having maturities of up to three months from the date of purchase are classified as cash equivalents, whose carrying value approximates fair value.

### Financial Instruments at Fair Value through Profit or Loss

Financial instruments at fair value through profit or loss include financial assets or liabilities held for trading and those designated on initial recognition to be measured at fair value with fair value changes recognized in profit or loss. On initial recognition, the financial instruments are recognized at fair value plus transaction costs and are subsequently measured at fair value with fair value changes recognized in profit or loss. The purchase or sale of the financial instruments is recognized and derecognized using trade-date accounting.

The fair value of open-end mutual funds is based on the net asset value on the balance sheet date.

### **Available-for-sale Financial Assets**

On initial recognition, available-for-sale financial assets are recognized at fair value plus transaction costs. When subsequently measured at fair value, the fair value changes are recognized directly in equity. The cumulative gain or loss that was recognized in equity is recognized in profit or loss when an available-for-sale financial asset is derecognized from the balance sheet. The purchase or sale of the financial instruments is recognized and derecognized using trade-date accounting.

Cash dividends are recognized as dividend income on the ex-dividend date, but are accounted for as reductions of the original cost of investments if such dividends are declared on the earnings of investees attributable to periods prior to the purchase of investments. Stock dividends are not recognized as current income but are accounted for only as an increase in the number of shares held. The cost per share is re-calculated based on the new number of shares.

An impairment loss is recognized if there is any objective evidence that a financial asset is impaired. If the amount of impairment loss decreases in the subsequent period, such decrease is recognized in equity.

The fair value of listed stocks is based on the closing price on the balance sheet date.

#### **Receivables**

The Corporation accesses evidence for specific and grouping impairment of receivables. Accordingly, all individually significant receivables are assessed for specific impairment. The Corporation groups' receivables that are not individually significance in accordance with credit risks and considers the historical trends of the probability of default, the timing of recoveries, and the amount of loss incurred to make the estimate of impairment.

#### **Inventories**

Inventories are recorded at the lower of weighted-average cost or net realizable value. When comparing cost and net realizable value, inventories are evaluated by individual items.

### **Investments Accounted for Using the Equity Method**

Long-term investments in which the Group owns 20% or more of an investee's outstanding voting shares or exercises significant influence on an investee are accounted for under the equity method.

In accordance with a newly revised Statement of Financial Accounting Standards (SFAS), the cost of acquisition is subjected to an initial analysis, and goodwill represents the excess of the cost of acquisition over the fair value of the identifiable net asset value. Goodwill is no longer amortized. If the fair value of identifiable net assets acquired exceeds the cost of investments, the excess should be assigned to non-current assets (except for financial assets not under the equity method, assets for disposal, deferred income tax assets, and prepaid pension costs or other retirement benefit costs). If these assets are all reduced to zero, the remaining excess should be recognized as extraordinary gain. Starting January 1, 2006, the unamortized balance of the excess of the acquisition cost of the long-term investment by the equity method over the equity in the investee's net asset value is no longer amortized, and this accounting treatment also applies to goodwill.

The cost and the resulting gain or loss of an investment sold is determined by the weighted-average cost method.

#### **Financial Assets Carried at Cost**

If there is no active market for an equity instrument and a reliable fair value cannot be estimated, the equity instrument, including non-publicly traded and emerging stocks, etc, is measured at cost. The accounting for the dividends from financial assets carried at cost is the same as that of an available-for-sale financial asset. Impairment losses are recognized if a decrease in the fair value of the instruments can be objectively related to an event. Reversal of impairment losses is not allowed.

### **Bonds Measured at Amortized Cost**

Bond portfolios with fixed or determinable payments and with no quoted prices in an active market are carried at amortized cost using the effective interest method. These bond portfolios are initially recognized at fair value plus transaction costs that are directly attributable to the acquisition or the issuance of the financial assets. Profit or loss is recognized at the time of derecognized, impairment or amortization. A regular purchase or sale of financial assets is recognized and de-recognized using trade date accounting.

If there is any objective evidence of impairment loss as of the balance sheet date, impairment loss should be recognized. If the impairment loss decreases, and the decrease can be related objectively to an event occurring after impairment loss recognition, the impairment loss should be reversed. However, the increased carrying value of an asset due to impairment loss reversal should not exceed the carrying value that would have (net of amortization) had no impairment loss recognized for the asset in prior years.

### Property and Equipment, and Assets Leased to Others

Property and equipment, and assets leased to others are stated at cost less accumulated depreciation and accumulated impairment. Significant additions, renewals, betterments and interest expenses incurred during the construction period are capitalized, while maintenance and repairs are expensed. Leased property and equipment from others covered by agreements qualifying as capital leases are carried at the lower of the present value of future minimum lease payments or the market value of the property on the starting dates of the leases.

For cost associated with dismantling and relocating fixed assets and restoring the leased premises housing our fixed assets to the previous state should be recognized as an addition to the fixed assets and accrued as a potential liability accordingly.

Depreciation is calculated using the straight-line method over the estimated service lives, which range as follows: buildings - 20 to 55 years; telecommunication equipment - 2 to 15 years; office equipment - 3 to 8 years; leased assets - 20 years; and miscellaneous equipment - 3 to 9 years.

Upon sale or retirement of property and equipment, the related cost and accumulated depreciation are removed from the accounts, and any gain or loss is credited or charged to non-operating gain or loss in the period of disposal.

### **Accounting for Leases**

In accordance with SFAS No. 2, "Accounting for Leases," a lease is identified as either an operating lease or a capital lease, based on the lease contract terms, the collectability of the leasehold, and the un-reimbursable costs to be incurred by the lessor.

The asset held under an operating lease is stated at cost and depreciated on the straight-line basis over the estimated useful life. Receivables collected are periodically recognized as rental income during the lease contract.

At the inception date of a capital lease, total leasehold receivables shall be recognized as all rental receivables plus the pre-determined bargain purchase price offered to the lessee upon maturity or estimated residual value. For a sales-type capital lease, sales revenue should be recognized as the sum of present value derived from each future rental receivable based on an implicit interest rate of the lease. The excess of total leasehold receivables over sales revenue should be deferred as unrealized interest income and amortized as interest income by the effective interest method upon each collection. For a financing-type of capital lease, leasehold receivables should be recognized as the sum of present value derived from each future rental receivable based on an implicit interest rate of the lease. The excess of total leasehold receivables over the present value of leasehold receivables should be deferred as unrealized interest income and amortized as interest income by the effective interest method upon each collection.

### **Intangible Assets**

#### a. Franchise

Franchise refers to the payment for the 3G mobile telecommunication services - License C. The 3G concession is recorded at acquisition cost and is amortized by straight-line method over 13 years and 9 months starting from the launch of 3G services.

### b. Computer software

Computer software cost is amortized by the straight-line method over 3 to 5 years.

### c. Goodwill

Goodwill is the unidentifiable difference between the cost of acquisition and the equity in the investee's net asset value. In accordance with the newly revised SFAS, goodwill is no longer amortized. Please refer to the accounting policy of investments accounted for by the equity method.

### d. Customer relationship and operating rights

The customer relationship and operating rights shall be identified when analyzing the excess of acquisition cost over the ownership in net assets value of an investee, and be booked at fair values provided by the purchase price allocation report.

Customer relationship and operating rights are measured on the basis of the future economic value and the useful life of the subsidiaries' cable TV and data network businesses. Customer relationship is amortized by straight-line method over 6 to 20 years. Operating rights is based on a license issued by the Ministry of Transportation and Communications. Although the license has a statutory period, the subsidiary can file for license renewal. Furthermore, it does not have a definite useful life in the light of future competition from IPTV. Thus, this intangible asset should be tested annually for impairment instead of being amortized in accordance with SFAS No. 37. An impairment test is also required if there is evidence of operating rights impairment due to certain circumstances.

Operating rights refer to the payment for acquiring the membership and related business about on-line music downloading. The operating rights are recorded at acquisition cost and are amortized by straight-line method over 5 years.

### **Idle Assets**

Properties not currently used in operations are stated at the lower of book value or net realizable value, with the difference charged to current loss. Depreciation expense is computed using the straight-line method over the estimated useful lives of the assets.

### **Deferred Charges**

Deferred charges, mainly interior decoration costs, are amortized by the straight-line method over 2 to 5 years.

### **Asset Impairment**

If the carrying value of assets (including property and equipment, intangible assets, idle assets, assets leased to others and investments accounted for using equity method and deferred charges) is more than its recoverable amount, which indicates that an impairment exists, an impairment loss should be recognized. Any subsequent reversal of the impairment loss for the increase in recoverable amount is recognized as income. The reversal of impairment loss on goodwill is not allowed.

#### **Pension Costs**

The pension costs under the defined benefit pension plan are recognized on the basis of actuarial calculations. The contribution amounts of the pension costs under the defined contribution pension plan are recognized as current expenses during the employees' service years.

#### **Income Taxes**

The inter-period and intra-period allocation methods are used for income taxes. Deferred income tax assets and liabilities are recognized for the tax effects of temporary differences, unused tax credits, and net operating loss carry forwards. Valuation allowance is provided for deferred income tax assets to the extent that more likely than not such assets will not be realized. Deferred tax assets or liabilities are classified as current or non-current according to the classification of related assets or liabilities for financial reporting. However, if deferred tax assets or liabilities do not relate to assets or liabilities in the financial statements, they are classified as current or non-current on the basis of the expected length of time before realized.

Tax credits for certain purchases of equipment and technology, research and development expenditures, and personnel training are recognized by the current method.

Adjustments to prior years' tax liabilities are added to or deducted from the current year's tax expense.

Income tax of 10% on unappropriated earnings generated is provided for as income tax in the year when the shareholders resolve to retain the earnings.

### **Treasury Stock**

The purchase of issued shares is accounted for by debiting treasury stock, which is a reduction of shareholders' equity. The Corporation's shares held by its subsidiaries are treated as treasury stock and reclassified from investments accounted for using the equity method to treasury stock.

If the proceeds on the disposal of treasury stock exceed the carrying value of treasury stock, the excess is credited to capital surplus from treasury stock. If the proceeds are less than the carrying value of treasury stock, the difference is debited to capital surplus from treasury stock. If the balance of capital surplus from treasury stock is not sufficient to absorb the difference, the rest is recorded as a reduction of retained earnings.

### **Foreign-currency Transactions**

Assets, liabilities, revenues or expenses denominated in foreign currencies as a result of foreign-currency transactions of non-derivative financial instruments are recorded in New Taiwan dollars at the exchange rates prevailing at the dates of transactions.

Monetary assets or liabilities denominated in foreign currencies are translated at the exchange rates prevailing on the balance sheet date, and the resulting exchange differences are included in profit or loss for the current period.

Non-monetary assets or liabilities carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the balance sheet date when the fair value was determined, and the resulting exchange differences are included in profit or loss for the current period except for the differences arising from the retranslation of non-monetary assets and liabilities in respect of which gains and losses are recognized directly in equity. For such non-monetary assets and liabilities, any exchange component of that gain or loss is also recognized directly in equity. Non-monetary assets or liabilities carried at cost that are denominated in foreign currencies are translated at the historical rates prevailing at the dates of transactions.

The above prevailing exchange rates are based on the average of bid and ask rates of major banks.

### **Revenue Recognition**

Revenues are recognized when the service rendering process is completed or virtually completed, and earnings are realizable and measurable. Related costs of providing services are concurrently recognized as incurred.

Service revenues from wireless services, value-added services, and fixed network services, net of any applicable discount, are billed at predetermined rates; the fixed-monthly fees on the basic cable TV services are accrued; prepaid card services are recognized on the basis of minutes of usage.

### **Promotion Expenses**

Commissions and cellular phone subsidy costs pertaining to the Corporation's promotions are recognized as marketing expenses on an accrual basis in the current period.

### 3. EFFECTS OF CHANGES IN ACCOUNTING PRINCIPLES

Effective from January 1, 2011, the Group adopted the SFAS No. 41 "Operating Segments." In accordance with SFAS No. 41, an entity should disclose information to enable users of its financial statements to evaluate the nature and the financial effects of the business activities in which it engages and the economic environments in which it operates. The Group determines and presents operating segments based on the information that is internally provided to the chief operating decision maker. In addition, the segment information should be disclosed in the consolidated

financial report by the Corporation, but it does not need to be disclosed in individual financial report. The Standard also supersedes SFAS No. 20 "Segment Reporting". The information for the period ended June 30, 2010 has been recast to reflect the new segment reporting requirement.

Effective from January 1, 2011, the Group adopted the third amended SFAS No. 34 "Accounting for the Financial Instruments: Recognition and Measurement". In accordance with the revised SFAS No. 34, initial receivables are applied to the statement of recognition, valuation, and impairment to receivables. There was no impact on the profit or loss for the six months ended June 30, 2011.

### (1) Taipei New Horizons Co., Ltd. (TNH)

TNH is established to invest in a property development project located in the old Songshan Tobacco Factory site. On January 15, 2009, TNH signed a 50-year BOT contract with Taipei City Government.

On January 25, 2010, TNH's Board of Directors resolved to increase TNH's capital by \$500,000 thousand, divided into 50,000 thousand shares with par value of \$10 per share, with record date of December 1, 2010. On November 19, 2010, TNH's Board of Directors resolved to adjust the above-mentioned TNH's capital by \$400,000 thousand, divided into 40,000 thousand shares with par value of \$10 per share. The Corporation subscribed for the shares based on the proportion of the share holding.

On June 2, 2011, TNH's board of directors resolved to increase TNH's capital by \$400,000 thousand, divided into 40,000 thousand shares with par value of \$10 per share, with a record date of August 1, 2011. The Corporation paid \$99,800 thousand for this capital increase from June to July 2011 and recorded such prepayment as prepaid investment. The Corporation subscribed for the shares based on its proportion of the shareholding, which remains at 49.9%.

### (2) Taiwan Kuro Times Co., Ltd. (TKT)

The subsidiary of the Corporation, TFNM, acquired 45% of the TKT's shares in May, 2010. On September 1, 2010, it further acquired more than 50% of the TKT's shares, and thus it had control over the TKT. The Corporation recognized investment loss on its investment in the TKT and TKT's subsidiaries.

### (3) Equity in investees' losses

The financial statements used as basis for calculating the carrying values of equity-method investments and the related losses were all not audited. The Corporation's management considered that, had these financial statements been audited, any adjustments would have been immaterial and would thus have had no material effects on the Corporation's financial statements.

The Corporation's investment losses were as follows:

### (1) Customer relationship and operating rights

Under SFAS No. 25 "Accounting for Business Combinations" and No. 37 "Accounting for Intangible Assets," the Group should measure the fair value of the acquired assets and identify major intangible assets as well as the amortization periods.

- (a) On April 17, 2007, TFN, the Corporation's 100%-owned subsidiary, acquired more than 50% of the former TFN through a public tender offer at the price of NT\$8.3 per share. The Corporation divided the former TFN and its subsidiaries into two cash-generating units, fixed network service and cable television business. Accordingly, customer relationship and operating rights are identified as major intangible assets.
- (b) Taiwan United Communication Co., Ltd. (TUC) was established on April 14, 2007, and was merged into TFN on January 1, 2008. In September 2007, TUC, the Corporation's 100% owned subsidiary, acquired more than 50% of Taiwan Telecommunication Network Services Co., Ltd. (TTN) shares at NT\$13.843 per share. TTN was merged into TFN on August 1, 2008. The Corporation measured the fair value of the acquired assets and viewed TTN's ISP services as one cash-generating unit. Accordingly, customer relationship is identified as major intangible asset.
- (c) Taiwan Kuro Times Co., LTD. (TKT) acquired the membership and related business about on-line music downloading from Darling Digital Co., Ltd. As of June 30, 2011, the carrying amounts after amortization is NT\$11,077 thousand.

#### (2) Goodwill

In conformity with SFAS No. 35, "Accounting for Asset Impairment," the Group identified the smallest identifiable group of cash-generating units by years and entities as follows:

The Group's members, which were engaged in mobile or wireless phone services, fixed network services, and the cable television business, were viewed as separate, independent cash-generating units. Thus, the recoverable amounts of the operating assets and goodwill were evaluated by business type, and the critical assumptions used for this evaluation were as follows:

#### (a) Wireless service

### (i) Assumptions on operating revenues

After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers, minutes of incoming and outgoing calls, and average revenue per minute.

### (ii) Assumptions on operating costs and expenses

The estimates of activation commissions and customer retention costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues.

### (iii) Assumptions on discount rate

In 2010 and 2009, the discount rate used to calculate the asset recoverable amounts of the Corporation was 7.47% and 8.50%, respectively.

#### (b) Fixed network service

#### (i) Assumptions on operating revenues

After taking changes in the telecom industry and competitive landscape into consideration, operating revenues were estimated on the basis of the types of data transmission and bandwidth on demand.

#### (ii) Assumptions on operating costs and expenses

The costs and expenses were based on the proportion of the actual costs and expenses to operating revenues.

### (iii) Assumptions on discount rate

In 2010 and 2009, the discount rates were 7.54% and 8.31%, respectively, in calculating the asset recoverable amounts of TFN.

#### (c) Cable television business

### (i) Assumptions on operating revenues

After taking changes in the cable television industry and competitive landscape into consideration, operating revenues were estimated on the basis of the projected changes in subscriber numbers and average revenue per subscriber.

### (ii) Assumptions on operating costs and expenses

The estimates of commissions, customer service costs, and bill processing costs were based on the projected changes in subscriber numbers. The estimates of remaining costs and expenses were based on the proportion of the actual costs and expenses to operating revenues.

### (iii) Assumptions on discount rate

The discount rates used to calculate the asset recoverable amounts for each System Operation was ranging from 3.70% to 8.00% and from 2.90% to 6.42% in 2010 and 2009, respectively.

Based on the key assumptions of each cash-generating unit, the Group's management believes that the carrying amounts of these assets for operating and goodwill will not exceed their recoverable amounts even if there are changes in the critical assumptions used to estimate recoverable amounts as long as these changes are reasonable for the years ended December 31, 2010 and 2009.

### n. Pension plan

The Labor Pension Act (LPA) provides for a defined contribution pension plan. Starting from July 1, 2005, the Group should contribute monthly an amount equal to 6% of the employees' monthly salaries to the employees' individual pension accounts. The contributed amount was \$86,697 thousand and \$84,895 thousand for the six months ended June 30, 2011 and 2010, respectively.

The Labor Standards Act (LSA) provides for a defined benefit pension plan. Benefits are based on the length of service and average basic pay of the six months before retirement. The Group contributes monthly an amount equal to 2% of the employees' monthly salaries to a pension fund. The pension fund is managed by an independently administered pension fund committee and deposited in the committee's name in the Bank of Taiwan (formerly the Central Trust of China, which was merged into the Bank of Taiwan in July 2007.) Approved by Department of Labor of Taipei City Government, the Group suspended contributing from February 2007 to January 2012.

#### o. Shareholders' equity

### (1) Capital surplus

Under the Company Act, capital surplus may only be used to offset a deficit. However, capital surplus generated from the excess of the issue price over the par value of capital stock, including the stock issued for new capital and the buyback of treasury stock, may be transferred to capital as stock dividends, and this transfer is restricted to a certain percentage of the paid-in capital and may be made only within prescribed limits each time. Also, the capital surplus from long-term investments may not be used for any other purposes.

### (2) Appropriation of earnings and dividend policy

The Corporation's Articles of Incorporation provide that a 10% legal reserve should be set aside from the annual net income after the reduction of accumulated deficit. The remainder, less special reserve based on relevant laws or regulations or business requirements, should be distributed as follows:

- (a) Dividends and bonus to preferred shareholders
- (b) Remuneration to directors and supervisors up to 0.3%
- (c) Bonus to employees 1%-3%
- (d) Remainder, to be appropriated as dividends as determined in the shareholders' meeting

The Corporation's dividend distribution is based on the availability of excess funds. That is the Corporation first projects future capital needs through a capital budgeting process and then provides for the projected capital needs by using retained earnings. The remainder is available for dividend distribution. However, the amount of stock dividends should not be more than 80% of the total dividends to be distributed in a single year. The final amount, type and percentage of the dividends are subject to the approval of the Board of Directors and shareholders based on actual earnings and working capital requirements of the Corporation in a particular year.

A regulation issued by the Securities and Futures Bureau requires a special reserve be made from the unappropriated earnings, equivalent to the debit balance of any account shown in shareholders' equity. The special reserve appropriated will be reversed to the extent that the net debit balance reverses.

The appropriation of earnings should be resolved by the shareholders in the following year and given effect in the financial statements of that year.

Under the Integrated Income Tax System, ROC resident shareholders are allowed a tax credit for the income tax paid by the Corporation. An imputation credit account (ICA) is maintained by the Corporation for such income tax and the tax credit allocated to each shareholder.

For the six months ended June 30, 2011, the bonuses to employees and remuneration to directors and supervisors were accrued respectively based on 3% and 0.3% of net income (net of the bonus to employees and remuneration to directors and supervisors) after setting aside 10% net income as legal reserve. The significant difference between annual accruals and the amount approved by the Board of Directors shall be adjusted in the current year. If the Board of Director's approval differs from the amount ratified at the annual general shareholders' meeting (AGM), the difference will be treated as changes in accounting estimation and will be adjusted in 2012's P&L. If employee bonuses are paid in the form of company shares, the number of employee bonus shares shall be derived from dividing the approved bonus amount by its closing price one day prior to the AGM, adjusted for cash and/or stock dividends if any.

The 2011 and 2010 earnings appropriation resolved by the AGMs on June 15, 2011 and June 18, 2010, were as follows:

|                                |                  |               | Dividend   | Per Share        |  |

The shareholders on June 15, 2011, resolved to distribute 2010 bonus of \$373,059 thousand to employees and remuneration of \$37,306 thousand to directors and supervisors.

The shareholders on June 18, 2010, resolved to distribute 2009 bonus of \$374,826 thousand to employees and remuneration of \$37,483 thousand to directors and supervisors.

Information on the appropriation of the earnings, bonus to employees and remuneration to directors and supervisors proposed by the board of directors and approved at AGM is available on the Market Observation Post System website of the Taiwan Stock Exchange.

### (3) Treasury stock

As of June 30, 2011, the Corporation's stocks held by TCCI, TID, and TUI (all are the subsidiaries 100%-owned by the Corporation) are 811,918 thousand shares, and the carrying and market value are \$63,167,190 thousand. The Corporation reclassified \$31,889,100 thousand from investments accounted for using the equity method to treasury stock based on SFAS No. 30, "Accounting for Treasury Stock." Although these shares are treated as treasury stock in the financial statements, the shareholders are entitled to excise their rights on these shares, except for the participation in capital injection by cash. In addition, based on the ROC Company Act, the shareholders of treasury stocks cannot exercise the voting right.

### (4) Unrealized gain or loss on financial instruments

The Accounting Research and Development Foundation (ARDF) issued Interpretation No. 2007-052 that requires companies to recognize bonuses paid to employees, and remunerations to directors and supervisors as compensation expenses beginning January 1, 2008. These bonuses and remunerations were previously recorded as appropriations from earnings. If the Corporation may settle the bonus to employees by cash or shares, the Corporation should presume that the entire amount of the bonus will be settled in shares and the potential share dilutions should be included in the weighted average number of shares outstanding used in the calculation of diluted EPS, if the shares have a dilutive effect. In the calculation of diluted EPS, the number of outstanding shares is derived from dividing the entire amount of the bonus by the closing price of the shares at the balance sheet date. Such potential dilutive effect should be taken into consideration in the calculation of diluted EPS until the shareholders resolved the actual number of shares to be distributed to employees at the AGM of the following year.

- (2) The methods and significant assumptions applied for determining fair values of financial instruments were as follows:
  - (a) Available-for-sale financial assets—based on quoted prices in an active market at the balance sheet date
  - (b) Financial assets carried at cost non-current and bonds measured at amortized cost- non-current—based on the net worth of the investee or estimated book value; this is because there is no active market for unlisted stocks, and a reliable fair value could only be verified at a more than reasonable cost
  - (c) Bonds payable based on the over-the-counter quotations in June
  - (d) The book values of short-term financial instruments approximate their fair value due to their short maturities; short-term financial instruments include cash and cash equivalents, receivables, pledged time deposits, refundable deposits, short-term borrowings and notes payable, payables, and guarantee deposits
- (3) The fair values of financial assets and liabilities were not simultaneously determined by quoted prices in active markets and by estimations using valuation technique.
- (4) The financial assets exposed to fair value interest rate risk amounted to \$8,892,164 thousand and \$5,080,180 thousand as of June 30, 2011 and 2010, respectively, and the financial liabilities exposed to fair value interest rate risk amounted to \$9,020,000 thousand and \$8,849,759 thousand as of June 30, 2011 and 2010, respectively. The financial assets exposed to cash flow interest rate risk amounted to \$945,390thousand and \$728,610 thousand as of June 31, 2011 and 2010, respectively, and the financial liabilities exposed to cash flow interest rate risk amounted to \$8,000 thousand and zero thousand as of June 30, 2011 and 2010, respectively.

#### (5) Information on financial risks:

(a) Market risk

The Group did not enter into any financial derivatives transactions, which will have big exposure to exchange rate and interest rate risks.

### (b) Credit risk

Credit risk represents the potential impacts to financial assets that the Group might encounter if counter-parties or third parties breach the contracts. Factors that affect the impacts include credit risk concentration, components of financial instruments, contract amount and other receivables. The Group's evaluation of credit risk exposure as of June 30, 2011 and 2010, were both zero because all counter-parties are reputable financial

institutions with good credit ratings.

The Group's maximum credit risk exposure of each financial instrument is the same as its carrying value.

The credit risk amount listed above is an evaluation over the contracts with positive fair value at the balance sheet date and the contracts of off-balance-sheet commitments and guarantees. Significant concentration of credit risk exists when counter-parties in financial instrument transactions significantly concentrate on one individual, or when there are a number of counter-parties in financial instrument transactions, but these counter-parties are engaged in similar business activities and have similar economic characteristics so that their abilities to perform contractual obligations would be concurrently affected in similar economic changes or other situations. The characteristics of credit risk concentration include the nature of the debtors' operating activities. The Group does not rely significantly on single transaction and transact with single client or in the same region.

#### (c) Liquidity risk

The Group's operating funds are deemed sufficient to meet the cash flow demand, therefore, liquidity risk is not considered to be significant.

The Corporation should disclose segments based on the customer's character. The segments are determined to provide different products. There are three segments which should be disclosed. Because each segment has different market attribute and marketing strategy, the followings are the explanations:

CBG: Provide mobile communication and related service for common users.

EBG: Provide integrated service about mobile and fixed communication for enterprise users.

HBG: Provide the service about cable TV and broadband communications to home users.

Note: The income of operating segment is determined by EBITDA and used to examine performance.
